CHAPTER

1

Introduction

Chapter 1: Introduction

Who is OVRDC?

The Ohio Valley Regional Development Commission consists of 12 counties within southern Ohio. These counties are Adams, Brown, Clermont, Fayette, Gallia, Highland, Jackson, Lawrence, Pike, Ross, Scioto and Vinton. The OVRDC District, which totals 6,022 square miles, represents 13.4 percent of the total area of Ohio; the 2010 Census population of 669,694 represents 5.8 percent of the total state population. Within OVRDC's twelve counties there are 171 Townships, 70 Villages, 9 Cities, and 14 Census Designated Places (CDP).

Transportation

Access

Map 1. – “Main Transportation Access Areas within OVRDC Region” depicts the major transportation access points into and out of the OVRDC District. The next section will discuss the major transportation segments listed on this map.

Linear

Infrastructure

Major routes that transverse the district are essential to the movement of goods and people and for the economic health of the district. These major routes include Interstate 275 & 71, U.S. 23, U.S. 35, U.S. 52, U.S. 62, U.S. 50, U.S. 68 and The Appalachian Highway (SR 32).

Additionally, according to ODOD Office of Strategic

Map 1 - Main Transportation Access Areas within OVRDC Region

Research 2002-2008 *Ohio County Profiles*, there has been an increase in the percent change of the number of passenger vehicles for Ohio at .6% with OVRDC at .5%, the number of trucks have increased faster for OVRDC at 3.4% and Ohio at 1.1%. This shows an increase in trucking and freight movement through the district.

Railroads

The OVRDC District is served by two major railroads: Norfolk Southern Corporation (NS) and CSX Transportation Inc. (CSXT). According to ODOT's Division of Rail Transportation, NS was created in 1982 and serves 20 states. CSXT was created in 1982 and serves 22 states. NS main north-south line traverses the region from Columbus, Ohio, to Hampton Road, Virginia. In April 2007, according to Ohio Department of Development, NS was awarded a 50 percent tax credit for an eight-year term to re-open its Portsmouth repair facility, located in Scioto County, Ohio. Another project that will affect the rail in the OVRDC District, started around October 2007 is called the "Heartland Corridor", which is a three-year engineering effort to increase intermodal freight capacity by raising vertical clearances in 28 tunnels on a Norfolk Southern rail line between the port of Hampton Roads, Virginia, to Columbus, Ohio, and Chicago, Illinois.

River Transportation

The OVRDC District is ideally located to take advantage of low transportation rates afforded by river transportation. The Ohio River borders Adams, Brown, Clermont, Gallia, Lawrence and Scioto counties and is navigable throughout. Barge transportation is available along the Ohio-Mississippi-Missouri River system, which connects the district with other industrial cities throughout the Midwestern and southern United States. The principal products transported on the Ohio River are coal, petroleum, sand, gravel, chemicals, iron, steel and grains. The State of Ohio ranks 5th in waterborne domestic tonnage (102 million short tons), according to the Army Corps of Engineers.

Airports

There are three major commercial airports within a maximum one and a half to two hour drive from the OVRDC District. They include The Greater Cincinnati International Airport, Port Columbus International Airport, and Tri-State Airport near Huntington, West Virginia. In 2004, OVRDC conducted an airport survey on the local airports within the district. Each county in the OVRDC District has a county airport. The Ross County Airport, Greater Portsmouth Regional Airport, Fayette County Airport and Jackson County Airport can handle large corporate aircraft. At this time, the majority of the district is served by both local and commercial facilities, although some safety, communications equipment, expansion, and additional hanger facilities are necessary.

Natural Resources

Forest Resources

One of the most valuable and abundant resources in the OVRDC District is the forest resource. According to the *Ohio EPA Land Cover Classification (1999 – 2003)*, the OVRDC District contains about 2,161,566 acres of forested land and Ohio has 10,115,167 acres. The district's forested lands are held in private ownership with only 20% or 451,851 acres of the total acreage held by federal, state or local public agencies. Major forest types in the district include oak-hickory and maple-beech-birch forests; with rarer Virginia-pitch pine and oak-pine forest types

also. In addition, our forests provide wood for use in a diverse wood products industry, which includes both primary and secondary processing facilities. Additionally, the district's forestlands attract tourists living outside the district to its many recreational areas, while greatly improving the quality of life for area residents.

Water Resources

The OVRDC enjoys an abundance of water resources, both surface and groundwater. Major waterways in the district include the Scioto, Little Miami and Ohio Rivers, which are fed by an abundant network of smaller tributary streams. In addition, there are major streams that flow through the OVRDC District such as Ohio Brush Creek, Paint Creek, Raccoon Creek and others. Numerous lakes in the district also provide water for consumption and recreational purposes. According to the *Ohio EPA Land Cover Classification (1999 – 2003)*, the OVRDC District and Ohio contains about less than 1% of the land cover considered "Open Water". Principal aquifer systems in much of the district underlie the Ohio River Valley and floodplain segments of the major tributaries. The water resources in the OVRDC District also provide recreation activities to the public like boating, swimming, fishing, etc.

Mineral Resources

The OVRDC District contains deposits of such industrial minerals as sand, gravel, clay, shale, limestone and dolomite, all of which are used primarily in the construction industry. Between 1993-2007, the employment at Ohio Industrial Mineral Operations for the OVRDC District increased by 13.7% compared to 3.2% for Ohio. However, even with the slow increase in employment, there is still a steady demand for minerals. This may indicate a slowdown in development and construction across the district and the state. There is still construction and upkeep of new and current infrastructure that helps in the demand for such products.

Fossil Fuels

Fossil fuels in the OVRDC District include limited natural gas, crude oil, and coal deposits. The local coal industry provides district residents with employment in mining and coal transportation. Rail and barge transportation in the district is also partially dependent on business from the coal industry. According to *Ohio State Energy Profile*, Energy Information Administration, Office Energy Statistics from the U.S. Government, the OVRDC District has six coal power plants and two natural gas power plants. In addition, several natural gas pipelines run through the OVRDC District. Therefore, fossil fuels are an important source of energy production for the district and Ohio.

Renewable Energy

Over the last few years with raising costs of fossil fuels energy, rise of alertness in greenhouse gases and environmental issues, development of sustainable energy sources, creating economic opportunities, developing a national energy source and other factors has brought the awareness of renewable energy to the forefront in the economic, political and social arenas. According to Ohio Department of Development, *Ohio Energy Office and Ohio Department of Agriculture* key areas for renewable energy in Ohio are: hydroelectric power, wind, biomass, biofuels and solar.

According to a study conducted by the Idaho National Engineering and Environmental Laboratory, the OVRDC District identified 60 sites for potential development of low power and small hydroelectric projects. According to a map called "*Wind Resources of Ohio*" produced for

the Ohio Department of Development, due to the topography of a majority of the OVRDC District, wind power is not very efficient, except for sections of Fayette, Highland, and Ross Counties. The OVRDC District has the potential for development of biomass and bio-fuels, such as, wood fiber, ethanol, and bio-diesel. Another source for energy is methane production from landfills, which OVRDC has six within the district. Solar energy is a viable option for Ohio and the OVRDC District. Southern Ohio receives more annual average solar resources potential than northern Ohio according to *National Renewable Energy Laboratory*. The OVRDC District would benefit best by a combination of multiple renewable energy resources to generate power and fuel than just relying on one source. The OVRDC District has the potential to generate this power from multiple resources.

Environmental Issues

Floodplain Management and Flooding

The OVRDC District has access to two major rivers: the Ohio River and the Scioto River. Several communities along the Ohio and Scioto Rivers and within the district are affected by flooding every year. In February 2005, the OVRDC District and Ohio were hit with a major flooding event, in which a Presidential Disaster Declaration was issued for 32 counties in Ohio, 3 of which are located in the OVRDC District. Local and incorporated communities that are part of the NFIP program must have a mitigation plan in effect to receive funds for future projects or disasters. In the OVRDC District, according to Ohio Department of Natural Resources in 2009, 52 communities had "CP" compliance with state standards and National Flood Insurance Program; only 9 communities that had "N" non-compliance status. Floodplain management has become a major focus in helping to control flooding in Ohio. The protection and management of the floodplains and the riparian zones are an important part in the planning process of forming predisaster mitigation plans for communities. With these plans in effect, communities will be better prepared for disasters and be able to recover faster after an event takes place.

Historically Significant Lands/Properties

The National Register of Historic Places has placed 250 sites within the OVRDC District on its list of sites of particular historic importance. Public lands in Ohio and the OVRDC District play an important role in the tourism industry. The Ohio Department of Natural Resources is the biggest public landowner in Ohio and the OVRDC District. Within the district, ODNR has 16 parks, 10 state forests, 13 nature preserves, and 42 wildlife areas and 6 lease control lands totaling 308,737.24 acres. In addition, the OVRDC District has public lands owned by Wayne National Forest, The Nature Conservancy, Ohio Historical Society, U.S. Park Service, and other smaller organizations with a total of 143,114.27 acres.

Population

Population

Over the last several years for the OVRDC District and Ohio, the population has increased. During 1990-2010, population grew twice as fast for the OVRDC District at 15.1% compared to Ohio at 6.4%, with Appalachian Ohio growing at 6%. The OVRDC District experienced a 29.3% increase in population from 1970-2000, which was greater than Ohio's. **(See Exhibit A)**

Migration

Migration into the OVRDC District has been greater than at the state level. During 1994-2007, the district experienced a net flow increase of 25,309 persons, while Ohio saw a net flow

decrease of 343,834 persons.

2010 Census

In 2011, the U.S. Census released new population on basic demographic data for the country. In 2010, the total population for OVRDC District was 669,694 with Ohio's population at 11,536,504. The largest minority group continues to be Black or African American with Hispanic being the second largest group, and Asian being third for both Ohio and OVRDC.

Projections

The projected population growth for OVRDC is projected at 762,680 in 2030 while Ohio will be 12,317,610. While comparing the percent change between 2000 to 2030, OVRDC increased by 19.92% with Ohio at 8.5%. **(See Exhibit A)**

Economy

Economic Situation

The economic situation for the OVRDC District differs from county to county depending on several factors. According to the *Appalachian Regional Commission designation in 2010*, Pike and Vinton Counties are considered Distressed; Adams, Gallia, Jackson, Lawrence and Scioto are considered At-Risk; Brown, Highland and Ross are considered Transitional; and Clermont is considered Competitive. The *Economic Development Administration in 2009* lists all OVRDC counties, except Clermont, in some form of Area Distress, which helps to determine EDA funding.

Labor Force and Unemployment

Average unemployment for Ohio was 5.5% during 1991-2008, while the OVRDC District was higher at 6.7%. The unemployment dropped to the lowest level in 2006 with rates for OVRDC at 6.0, Ohio at 5.4 and the U.S. at 4.6. During 2007-2008, the unemployment rate grew for all geographic levels. According to WARN Notices (Worker Adjustment Retraining Notification-WARN Act), from 2007 through August 2011, OVRDC lost 4,542 jobs from 21 companies downsizing or closing. In 2009, monthly unemployment rates continued to rise, with double digits for Ohio and the OVRDC District. According to Ohio Department of Job and Family Services, Ohio Labor Market Information, in January 2009, the unemployment rate for OVRDC was 11.1; with Ohio at 8.8; and the U.S. at 7.6. In July 2009, the unemployment rate was 11.2 for Ohio and 11.9 for the OVRDC District.

From the 2000 Census Summary File 3 Employment Report, over half of the labor force are women 16 and over, with total numbers for Ohio at 4,591,821 and OVRDC at 251,179. The male labor force, 16 and over, was 4,196,673 for Ohio and 237,743 for the OVRDC District. The labor force has increased over the last 11 years; 18.4% for the OVRDC District; 13.5% for the U.S. and 8.3% in the State of Ohio. The percentage of the civilian labor force employed was 55.7% for Ohio and 48.6% for OVRDC District. Total full and part time employment during 1994-2006 increased twice as fast for the OVRDC District at 27%, compared to Ohio at 11.3% and the U.S. at 14.6%.

Major Economic Sectors

Between 1990 and 2000, the economic sectors were reclassified by the U.S. Census Bureau and by the Bureau of Economic Analysis. The breakdown of the following sectors is lagging

because the latest data available is from 2006 from the U.S. Census - County Business Patterns and Bureau of Economic Analysis. This information does not reflect the current economic recession downturn, but does show the potential of the OVRDC District compared to Ohio and the U.S.

All Economic Sectors

According to the 1990 and 2000 Census, the OVRDC District saw an increase in the number employed by 19.7%. This is twice the level of the State of Ohio at 9.5%, and OVRDC is higher still than the national level at 12.1% during 1990 – 2000. According to *Bureau of Economic Analysis*, from 2001-2006, the percent change in the total number employed was the greatest for the OVRDC District at 7.8% with U.S. at 6.8% and Ohio at 2%. According to the *County Business Patterns*, the percent of average annual salary during 1998-2006 grown slower for OVRDC at 12.8%, compared to the U.S. at 26.1% and Ohio at 22.4%. OVRDC at 5.4% and the U.S. at 10.4% have experienced a gain in the number of employees according to the *County Business Patterns* 1998-2006 compared to a slight gain for Ohio at .4%.

Manufacturing

According to *County Business Patterns* for 1998 to 2006, the average annual salary for manufacturing increased slower for the OVRDC District at 7.6% compared to an increase for Ohio at 19.4% and U.S. at 23.8%. According to the *County Indicators 2006*, manufacturing employment from 1994-2006 decreased faster for Ohio at 23.7%, compared to U.S. at 22.1% and the OVRDC District at 14%. According to *Bureau of Economic Analysis*, this trend was the same for 2001-2006, the percent change in the number employed which was the greatest for Ohio at 15.8% and the U.S. at 15.2% compared to a loss of 13.1% for the OVRDC District.

Construction

According to the 1990 and 2000 Census, the percentage change of the number employed has increased faster for the OVRDC District at 35.8% compared to Ohio at 27.7% and US at 22%.

There was a change in this sector in 2006, according to the *County Business Patterns* for 1998 to 2006, Mid-March Employment (1998-2006) increased faster for the U.S. at 23.8% compared to OVRDC at 1.7% while compared to a drop for Ohio at 1.8%. In addition, the percent change in the average annual salary for construction increased faster for the U.S. at 24.7% compared to the growth of Ohio at 20.9% and the OVRDC at 10.2%. According to *Bureau of Economic Analysis*, this trend is the reverse for OVRDC, with a loss at 1.2% and gain for Ohio at 8.5% and the U.S. at 17.6% during 2001-2006 in job numbers.

Wholesale Trade

According to the *County Business Patterns* for 1998 to 2006, the percent change in the average annual salary increased slower for OVRDC at 6.8%, while Ohio jumped to 27.6%, and the U.S. at 30.1%. Nevertheless, Mid-March Employment is down for Ohio at -6.8% compared to a slight increase for the nation at 2.5% and OVRDC at 0.8%. According to *Bureau of Economic Analysis*, for 2001-2006, the percent change in the number employed, which decreased for Ohio at 1.1% compared to an increase for OVRDC at 4.6% and U.S. at 4.1%.

Retail Trade

According to the *County Business Patterns* for 1998 to 2006, the percent change of the average

annual salary increased for OVRDC at 5.9% compared to a huge gain for Ohio at 20.4%. In addition, there has been an increase in the Mid-March Employment 1998-2006 for OVRDC at 1.16% and for the U.S. at 10.2% compared to a decrease for Ohio at 3.8%. According to *Bureau of Economic Analysis*, for 2001-2006, the percent change in the number employed which was the greatest for OVRDC 6.1% and U.S. at 3.6%, compared to a loss of 4.3% for Ohio.

Educational, health, and social services

According to the 1990 and 2000 Census, the percentage change of the number employed in these sectors for OVRDC at 38.1% increased compared to Ohio at 22.1% growth level, and the U.S. at 33.8%. According to *Bureau of Economic Analysis*, the percent change in the number employed for the Education Service 2001-2006 relative equal growth for the OVRDC District at 23.6%, Ohio at 22.2%, and U.S. at 21%. In addition, according to the *County Business Patterns* for 1998 to 2006, for healthcare and social services average annual salary increases have lagged behind for the OVRDC District at 14.5% compared to Ohio at 25% and the U.S. at 27.9%. Furthermore, Mid-March Employment for the same time increased faster for the OVRDC District at 21.8% compared to Ohio at 15%. According to *Bureau of Economic Analysis*, this trend is the same for 2001-2006; the percent change in the number employed which for healthcare and social services was the greatest for OVRDC at 18% compared to an Ohio at 11.7%.

Agriculture

According to *Bureau of Economic Analysis*, during 2001-2006 the percent change in number employed has decreased faster for the U.S. at 6.2% compared a smaller decrease for Ohio at 3.7% and OVRDC at 3.4%. According to the *1987-2007 Agricultural Census*, the number of farms have increased in OVRDC at 6.5%, while in Ohio they have decreased by 4.6%.

Additionally according to the *1987-2007 Agricultural Census*, the average size of the farm has decreased for Ohio at 2.3% and OVRDC at 14.3%. In addition, the number of acres of farmland has decreased from 1,803,047 acres in 1987 to 1,714,770 acres in 2007 for the OVRDC District.

The percent decrease for the OVRDC District was 5% and Ohio at 7.2% from 1987 to 2007. According to *Annual Agriculture Report, Ohio Department of Agriculture* for 1999-2006, the percent change in cash receipts per farm increased for both Ohio at 26.8% and the OVRDC District at 24.5%. Also, according to *2002-2007 Agricultural Census*, market value of agricultural products sold increased for the OVRDC District at 51% and Ohio at 65.8%.

Businesses

According to *Ohio County Indicators*, the number of active businesses increased for Ohio at 6.5% compared to the OVRDC District at 2.5% from 1993-2007. According to *Ohio County Indicators*, the rate for business starts during 1996-2009 was lower for OVRDC at 114.6 compared to Ohio at 116.8. The *Ohio Department of Development, Office of Strategic Research* annually compiles a database on the announced business expansions and attractions, called the *Ohio Private Investment List*. During 2005-2008, there were 98 projects in the OVRDC District totaling 4,723 jobs with an investment of \$1,862,137,000. From the 98 projects, 37 were new plants and 61 expansions to current buildings. During 2005-2008 for Ohio, there were 2,178 projects with 93,690 jobs created and an investment of \$32,981,057,000.

Commuting

The majority of the workforce in the OVRDC District commutes to work at an average of 29.4 minutes in 2000, while Ohio is below this at 22.9 minutes. The method of commuting patterns varied greatly in 2000. For the OVRDC District, 81.7% of the population drove alone compared to Ohio at 82.8%. Public transport was 0.6% for OVRDC compared to Ohio at 2.1%.

Housing

During 1990-2000, the percent change in the total number of households was greater for the OVRDC District at 29.8% compared to Ohio at 14.8%. During 1980-2000, the OVRDC District at 24.9% has seen a greater percentage increase in growth in the number of housing units compared to the State of Ohio figures at 21.9%. OVRDC had a greater percentage change 16.6% overall compared to Ohio at 10.8%. For the same period, the rental percentage change for OVRDC was 6.5% compared to Ohio's percentage of 3.2%. Homeowner vacancy rate for Ohio increased by 20.7% in this same timeframe, which was higher than OVRDC's growth rate of only 9%, but the rental vacancy rate was reversed with the district's increase at 27.2% when compared to Ohio's increase of only 10.1%.

According to the U.S. Census 2000-2008 the increase in number of estimated housing units for the OVRDC District at 5.5% has grown slightly slower than Ohio at 5.6% but was under the increase for the U.S. at 9.9%. After the collapse of the housing market around 2006-2007 new homes are still being built, but there has been a downturn in number of new housing units authorized by building permits for both Ohio at -44.7% and OVRDC at -14.7% for 1998-2007, according to the *U.S. Census Building Permits Survey*. The number of sales reported in the "*Residential Sales Data by County and Jurisdiction*" between 2005-2008 the percent change for residential sales of homes has decreased for both Ohio at -29.5% and OVRDC at -18.5% while the median sales price has slightly increased for both Ohio at 0.86% and OVRDC at 3.4%. According to the 2010 Census, OVRDC only accounts for 5.8% of the total housing units compared to the state level.

According to foreclosure data from *Ohio Secretary of State -- Better Lives, Better Ohio* -- by RealtyTrac, according to the data between 2006-2008 percent change in foreclosures increased faster for OVRDC at 102.9% compared to Ohio at 83.6%. For OVRDC in 2006 there was 1,332 foreclosures which increased to 4,088 in 2008, Ohio had 113,570 foreclosures in 2008. Another source for foreclosure data was The Supreme Court of Ohio, which had a list of new foreclosure filings for 2004-2008. Courts across Ohio 2008 reported 85,773 new foreclosure filings, marking the 13th consecutive annual increase, with the OVRDC District reporting 3,823 new foreclosure filings. The percent change in new foreclosure filings from 2004 to 2008 was higher for Ohio at 45.3% compared to OVRDC at 37.4%

Income

From the 2000 Census Summary File 3 income data, the median household income increased 9.9% for Ohio during 1990-2000, for the U.S. it was 7.7% and for the OVRDC District 18.7%. The median household income for the OVRDC District was \$31,155, while Ohio was \$40,956 and the U.S. was \$41,994. The percent change in the per capita income during 1990-2000 registered for the U.S. was 15.3%, Ohio was 20.2%, and OVRDC District was 27.5%. The per capita income value for the district is still below the national and state levels in 2000 (\$16,335 for OVRDC District, \$21,003 for Ohio, and \$21,587 for the U.S.).

According to the *Bureau of Economic Analysis, Regional Economic Information System*, personal per capita income growth from 1995-2006 for the OVRDC District at 56.3% was faster than Ohio at 46.2% but the rate was the highest for U.S. at 57.9%. However, in 2006 the personal per capita income was much lower for the OVRDC District at \$24,914 compared to Ohio at \$33,320 and U.S. at \$36,714. According to U.S. Census, *Small Area Income and Poverty Estimates (SAIPE)* for 2001-2007 the percent change in median household income increased faster for the OVRDC District at 17.6% compared to Ohio at 11.1%, and the U.S. at 18.6% grew the fastest over this time frame. However, in 2007 the median household income was much lower for OVRDC at \$37,230 compared to Ohio at \$46,645 and the U.S. at \$50,740.

Poverty

From the 2000 Census Summary File 3 of the poverty data, the percent of families below the poverty level improved for Ohio from 9.7% in 1990 to 7.8% in 2000, while the OVRDC District experienced a decrease from 17.6% to 11.7%. The individual percentage poverty levels have also improved for Ohio from 12.5 % in 1990 to 10.6% in 2000 and for OVRDC from 20.7% to 15.1%. The poverty level for children 18 years and under has improved from 1990-2000, with Ohio decreasing from 17.8% to 14% and OVRDC falling from 27.5% to 19.7%.

According the table below the U.S. Census, *Small Area Income and Poverty Estimates (SAIPE)* for 2001-2007 the percent change in poverty estimated for all ages increased for Ohio at 24%, OVRDC District at 17.5% and the U.S. at 14.3%. However, the estimated poverty rate for all ages in 2007 was the highest for the OVRDC District at 18% compared to Ohio at 13.1% and the U.S. at 13%. The poverty rate for ages 18 and under was higher for the OVRDC District at 26.5% compared to Ohio at 18.4% and the U.S. at 18%.

Environmental Infrastructure

Water Supply and Distribution

According to the 2005 OVRDC Survey of Waste Water Treatment Facilities and Water Facilities, the district contains 80 water facilities. It should be noted that many public and private water systems rely on wells in the Ohio and Scioto River Valleys. District water is supplied through ground water and surface water from the Ohio River Main Stem, the Scioto River Basin, and the Little Miami River Basin, as well as various rivers, streams, wells and lakes. Over the last decade, OVRDC has continued to provide assistance to the improvement and development of water treatment and water line extensions.

Sewage Collection and Treatment

Wastewater treatment in the district is provided by both centralized collection/treatment facilities and septic systems. Of the centralized systems, which are typically owned and operated by municipalities, the most frequently used treatment types include contact stabilization, chlorination, filters, and settling. According to the 2005 OVRDC Survey of Waste Water Treatment Facilities and Water Facilities, it has been determined that the district contains seventy-one public wastewater treatment facilities that include over 112,216 total service connections at the present time.

Selected Non-Linear Infrastructure

Health Services and Facilities

Basic primary-care health facilities are available in most counties; however, health care

professionals and health services are still in short supply in many areas of the district. Short-term medical and surgical services are provided to area residents through the 12 hospital facilities located throughout the district in 2008. According to *ODOD Office of Strategic Research 2002-2008 County Profiles* there has been percent increase in the number of doctors for the OVRDC District at 8.9% compared to a decrease for Ohio of 22.7%. According to *ODOD Office of Strategic Research 2002-2008 County Profiles* there has been percent increase in the number nursing homes for the OVRDC District at 104.6% and Ohio at 95.1% with an increase in the number of licensed residential care units for Ohio at 120.8% and OVRDC at 94.4%. In 2008, long-term care is provided for aging residents, and others who might require such care, through the 135 rest and nursing homes scattered throughout the district.

In 2004, OVRDC at 14.2% had a higher percent of its population that did not have health insurance, while Ohio had only 12.7%. Additionally, in 2004, children uninsured is higher for the OVRDC District at 6.5% compared to Ohio at 5.45%. Furthermore, in 2004, the OVRDC District at 54.35% of adults with employer-based insurance was lower than Ohio at 62.55%. Finally, in 2004, more people in the OVRDC District, 21%, are on Medicaid compared to only 12% for Ohio.

Education

Education in Ohio is mandatory to the age of 16. Educational service providers in the OVRDC District include 56 public schools districts, 27 private and parochial schools, seven joint vocational schools, and five colleges and universities in 2008. According to the *Ohio County Profiles*, percent change in the number of students in 2002 to 2008 decrease slower of OVRDC at 0.2% compared to Ohio at 3%. During this same time, the percent change in teacher ratio to students change by 14.2% for OVRDC and 25.7% for Ohio. Additionally, the percent in funding per student has increased by 30.5% for the OVRDC District and 25.7% for Ohio. In 2009, the state average was higher for the expenditures per pupil with Ohio at \$ 9,587 compared to OVRDC at \$ 8,677. Finally, the percent change in the graduation rate has increased faster for OVRDC District at 11.8% compared to Ohio at 7%.

From the 2000 Census Summary File 3 of education attainment, the percent of people having a high school degree or higher has increased over the past 10 years for Ohio from 75.7% in 1990 to 83% in 2000 and for the OVRDC District from 64.2% to 74.5%. There has been an increase in the percent of people having a bachelor's degree or higher in the last ten years (1990-2000) for Ohio (from 17.1% to 21.1%) as well as the OVRDC District (from 8.4% to 10.6%).

Telecommunications

In the last decade, there has been an increase in the focus on technology for Ohio and the Appalachian Region of Ohio. Over the last couple of years, there has been a focus on broadband connections. In Ohio, there is a program called "Connect Ohio" that is the driving force behind the development of broadband connections in the state. In 2008-2009, Ohio Valley Regional Development Commission supported an initiative called Connecting Appalachia. Under this program, there were four main projects:

1. Southern Ohio Health Care Network Fiber Optic Backbone
2. Broadband Coverage of the Rural Expanse
3. World Class Connectivity for Industrial Parks
4. Telemedicine Initiative

Economic Cluster Analysis

The Economic Development Administration (EDA) requires that an “economic cluster analysis” be included in each Economic Development District’s Comprehensive Economic Development Strategy (CEDS). According to the EDA, industry clusters are concentrations of competing, complementary, or interdependent firms and industries that do business with each other and/or have common needs for talent, technology, and infrastructure (EDA website).

The following are traditional and emerging clusters to note in the OVRDC District. These clusters are not the only economic groupings in the district, but were selected due to their prominence, employment concentration factor, economic prosperity factor, export-oriented, need of support, or opportunity for facilitation. It is very important to note that this is only a summary report of the economic cluster analysis for the district. The clusters identified were:

- Agriculture Related Businesses
- Healthcare Related Businesses
- Wood Industry and Related Businesses
- Total Manufacturing Sector

Table 1: OVRDC Economic Cluster Analysis, depicts the breakdown of each cluster from the database that identifies the number of establishments, total number employed, total sales volume

Table 1: OVRDC Economic Clusters Analysis						
Businesses that have 10 or more employees	Number of Businesses	Total Employment	Total Sales Volume	Average Sales Volume per Business	Percent of Business for OVRDC	Percent of Employed for OVRDC
Agriculture Related Businesses	24	649	\$268,018,000	\$412,971	0.71	0.44
Healthcare Related Businesses	344	25,986	\$3,109,697,000	\$119,668	10.16	17.62
Wood Industry and Related Businesses	56	7,329	\$2,109,892,000	\$287,883	1.65	4.97
Total Manufacturing Sector	272	26,509	\$9,836,005,000	\$371,044	8.03	17.97
Freight and Transportation Related Businesses	72	3,178	\$348,932,000	\$109,796	2.13	2.15
All OVRDC Businesses	3,386	147,486	\$27,207,779,000	\$184,477	100.00	100.00

Note: Agriculture Related Businesses, Healthcare Related Businesses, and Wood Industry and Related Businesses includes businesses from the Total Manufacturing Sector because the nature of the products produced.

Analysis by JG OVRDC Data and GIS/GPS Mapping Center

Table 1: OVRDC Economic Cluster Analysis

(information was available for majority of companies), average sales volume per company and percent of business and employed for the OVRDC District.

Agriculture Related Businesses

According to *Table 1: OVRDC Economic Cluster Analysis*, there are 24 agriculture related businesses within the OVRDC District, which caters to the farm industry. This cluster employed

over 649 people with over \$261 million in total sales volume. This accounted for only a fraction of a percent compared to the overall amount for the OVRDC District. These companies directly

or indirectly support agricultural businesses and services in the district. The reason that this industry cluster was identified was that its major land resource prominence, export-oriented, need of support, and opportunity for facilitation. According to the U.S. Department of Agriculture, there were 10,502 farms located in the district in 2007. The majority of farmland is located in the western to northwestern portion of the district. According to *U.S. Department of Agriculture*, total market value of agricultural products sold for the OVRDC District at 51% has nearly double in 2002 over 2007, compared with Ohio at 61.8%. The market value of agricultural products sold - Crops (\$1,000) has increase for both the OVRDC District at 61.7% and Ohio at 78%. While overall income for farming has increased for the district at 22%, the costs of running the farms has increased faster at 34%. Corn, soybeans, wheat, potatoes, tobacco, cattle, pigs, goats, sheep, and poultry are the main commodities produced in the district.

Healthcare Related Businesses

According to *Table 1: OVRDC Economic Cluster Analysis*, 344 healthcare related businesses have 10 or more employees within the OVRDC District that employ 25,986 people. Healthcare related businesses make up around 10% of the overall businesses within the region, employing 17.6% of the labor force. The reason that this industry cluster was identified was that its prominence, employment concentration factor, and the economic prosperity factor. According to the *County Business Patterns* for 2006, the percent of the labor force for healthcare and social services was the greatest for the OVRDC District at 18% compared to Ohio at 15% and US at 14%.

Wood Industry and Related Businesses

According to *Table 1: OVRDC Economic Cluster Analysis*, there are 56 Wood Industry and related businesses that have 10 or more employees within the OVRDC District that employ 7,329 people. Through the Wood Industry and related businesses cluster accounts for only 1.65% of businesses with 10 or more employees in the OVRDC District, its total sales volume at \$2.109 billion accounts for 7.8% in the OVRDC District. The reason that this industry cluster was identified was that its land resource prominence, export-oriented, need of support, or opportunity for facilitation.

Total Manufacturing Sector

According to *Table 1: OVRDC Economic Cluster Analysis*, there is a total of 272 Total Manufacturing Sector that have 10 or more employees within the OVRDC District that employ 26,509 people. The Total Manufacturing Sector cluster accounts for nearly 8% of businesses with 10 or more employees in the OVRDC District, its total sales volume at \$9.836 billion accounts for 36.2% in the OVRDC District. The reason that this industry cluster was identified was its prominence, employment concentration factor, economic prosperity factor, export-oriented, need of support, and opportunity for facilitation. Through there are several sub-clusters within the Total Manufacturing Sector, they all rely on resources and infrastructure needs within the district. According to the *County Business Patterns* for 2006, the percent of the labor force for manufacturing sector was the greatest for the OVRDC District at 18.2% compared to Ohio at 16.3% and U.S. at 11.3%.

OVRDC 2011 CEDS Performance Report

Past EDA Investments

From 1966 to 2010, EDA has invested in 132 projects totaling \$80,694,864 in the OVRDC District. Listed below is a list of these past EDA Projects.

Applicant	Project Name	Year	Amount of Grant
Village of Manchester	Sewer System	1966	\$415,000
Village of Winchester	Sewage Treatment Plant	1966	\$2,000
Village of Georgetown	Water System Improvement	1966	\$1,000
Village of Batavia	Water System	1966	\$246,000
Clermont County Commissioners	Water System	1966	\$976,000
Gallipolis	Water Line Extension	1966	\$114,000
Wellston	Water System	1966	\$1,207,000

Chapter 2: Community and Private Sector Participation in CEDS

OVRDC Full Commission

Community and private sector participation in the Ohio Valley Regional Development Commission's (OVRDC's) Comprehensive Economic Development Strategy (CEDS) process comes through many channels but really starts with the OVRDC membership (**see Exhibit B**), commonly referred to as the "Full Commission". OVRDC is a 12-county membership organization that includes elected officials from various levels of government, private sector representatives, chambers of commerce representatives, human service organization representatives, local planning commission representatives, post-secondary education/labor organization/workforce development board representatives, and minority representatives from each of the twelve member counties. The Full Commission includes a total of 175 members from the twelve member counties. In addition to these members; there are also committees such as the Project Review Committee (**see Exhibit B**) and Revolving Loan Fund Committee (**see Exhibit B**) that include economic development and financial institution professionals, both of which provide significant input into OVRDC investments in the region.

Each county's membership in the OVRDC Full Commission is called the County Caucus. The twelve County Caucuses function as the basic local participation mechanism for the OVRDC, including initial formulation of all OVRDC plans, projects, goals, and priorities. Therefore, each county caucus provides input into the development of the Comprehensive Economic Development Strategy (CEDS). The County Caucuses serve as the local committee which annually compiles, revises, and prioritizes a package of county development projects, which are meant to meet the development needs of the county and its local subdivisions. As part of this role, the county caucus also annually prioritizes potential Appalachian Regional Commission (ARC) and Economic Development Administration (EDA) eligible projects (**see Exhibit C**). These top priority projects identified are those which OVRDC staff will focus its technical assistance in planning and financial packaging during the next year.

Caucus meetings are open to the public, and participation by citizens and various economic and community development organizations, which may or may not be a member, is strongly encouraged. The broader the representation in each county, the more we can be assured that we are addressing the major development needs of the county.

The twelve member counties actively support and currently participate in the Economic Development District (EDD) activities of the OVRDC. The 12 member counties during 2010 invested \$112,011 of local funds based on the 2008 population estimates (658,889) at seventeen cents per capita. The investment from the counties for 2011 will be \$112,004 based on the 2009 population estimates (658,839) at seventeen cents per capita. Copies of the 2011 adopted resolutions from the members are included (**see Exhibit D**).

OVRDC 2011 CEDS Performance Report

OVRDC Executive Committee

On behalf of the 175-member OVRDC Full Commission, the OVRDC Executive Committee is responsible, among other duties, to review and give final approval of the CEDS. The OVRDC staff develops the document with input from the County Caucuses and the CEDS Committee before having it approved by the Executive Committee. OVRDC's Executive Committee includes local elected officials from each county, private sector representatives, a minority representative, and several members-at large that represent one of the following areas: chambers of commerce, workforce development, labor, or post-secondary education. The main function of the Executive Committee is to coordinate the day-to-day operations of OVRDC.

During the last several years, OVRDC has strengthened its coordination and working relationship with other major development agencies by expanding the ex-officio membership of our Executive Committee. We have included representatives of the following agencies: Economic Development Administration, Governor's Office of Appalachia, Ohio Department of Development, Ohio Department of Transportation, USDA/Rural Development, regional resource conservation agencies, congressional offices, and state representatives. Our monthly Executive Committee meetings regularly include representatives from USDA/Rural Development, Congressional offices, and the Governor's Regional Economic Development Office.

OVRDC CEDS Committee

By-law revisions in 2006, which were necessary to comply with EDA's new regulations, have created a separate CEDS Committee for OVRDC. The new OVRDC by-laws went into effect on October 1, 2006 and the CEDS Committee was appointed by the Chairman of OVRDC at the March 2007 meeting of the Full Commission. The CEDS Committee consists of 23 members as follows: the OVRDC Vice-Chairman, 12 private sector members, 5 public officials, 1 minority member, and 4 members-at-large. The 2010 CEDS has been developed by OVRDC staff in conjunction with the CEDS Committee and the County Caucuses. The CEDS Committee presented the document for approval by the Executive Committee in November 2010. The completed 2010 CEDS Performance Report was sent to the EDA Chicago Regional Office in December 2010.

Austin Keyser	IBEW #575 Business Manager	Organized Labor

OVRDC Staff

OVRDC has a professional staff of 9 with expertise in general economic and community development planning and enhancement; as well as staff that have specialized planning skills to support the culmination of the CEDS document. The staff also offers planning and technical assistance support for developing and implementing priority regional and local development projects. Project development coordination meetings with the Governor's Office of Appalachia and the other three development districts have continued over the past year. OVRDC staff is responsible for developing annual work programs for our Economic Development Administration (EDA) Economic Development District (EDD) grant, our Appalachian Regional Commission (ARC) Local Development District (LDD) grant, and our State of Ohio LDD support grant. When these applications are submitted annually, the work program elements are drawn from the priority objectives and strategies of our most recent CEDS document.

OVRDC Staff –November 18, 2011

Name	Position	Years Working at OVRDC
John Hemmings	Executive Director	20 years
Michele Throckmorton	Development Director	18 years
Juanita Bragg	Finance Director	24 years
Kim Reynolds	Community Development Coordinator	14 Years
Jason Gillow	Research/Planning Specialist II	10 Years
Jessica Purdon	Economic Development Specialist	1 ½ Years
Sharon Clark	Administrative Assistant	7 Years
Shannon Nichols	Program Secretary II	10 Years
Melody Thompson	Bookkeeper/Secretary	1 Year

Chapter 3: CEDS Performance Measures Review

The Ohio Valley Regional Development Commission (OVRDC) annually updates and submits its Comprehensive Economic Development Strategy (CEDS) to the Economic Development Administration (EDA). In 2009, OVRDC completed a revised CEDS document for the region. For 2010, OVRDC is completing a CEDS Performance Report to measure progress of implementation of the 2009 revised CEDS. Progress on OVRDC's 2009 CEDS will be measured by 1) reporting the number of jobs created and private investment in the OVRDC region along with the number of job losses; 2) reporting the performance activities of OVRDC in 2010 and 2011; and 3) reporting progress thus far on the goals and objectives identified in the 2009 CEDS.

The Ohio Department of Development, Policy Research and Strategic Planning Office reports in its 2009 Ohio Private Investment list that eight companies in the OVRDC region generated private investment of \$96,000,000 and created 110 jobs. In 2010, Ohio Private Investment listed six companies in the OVRDC region generated private investment of \$17,725,000 and created 268 jobs (see **Exhibit E**).

The Ohio Department of Job and Family Services, Bureau of WIA-Rapid Response Section reports in its Current WARN Notices (2006-2011) List that 21 companies in the OVRDC region have had layoffs totaling 4,956 employees (see **Exhibit E**).

Upon further analysis of the Private Investment list from previous years, the main trend is that small metal manufacturing and plastic companies within the region has been investing in expansion and new growth projects on a continuing basis from year to year. Additionally there has been a decline in the new expansion and growth for wood related companies in the last few years. Other notable investments recently are the relocation of companies' headquarters to the region, investments in intermodal development and healthcare projects. All these new investments help create jobs and new opportunities throughout the region. Also further analysis of the WARN notices, show that several automotive and wood related companies have been downsizing or closing, this is directly related to the downturn spiral of the housing and automotive industries and the recession from the past few years. Finally the closing of DHL in Clinton County had a negative impact on the local workforce for the northwest portion of the OVRDC Region.

OVRDC produces an Executive Director's Annual Report and presents it to the Full Commission members at their March meeting (see **Exhibit F**).

OVRDC has identified the following performance measures for identified Goals and Objectives from the 2009 revised CEDS. These measures of performance reflect performance in late 2009 and all of 2010.

CEDS Goals, Objectives and Plan of Action

The CEDS Committee, meeting twice over that past six months, worked with information gathered through the county and regional SWOT analysis, as well as various sources of local, regional, state and national economic data developed the following Goals, Objectives and Strategies. Throughout the process, the committee used as a guide and incorporated the State of Ohio's Department of Development Strategic Plan (see attached executive summary). We adopted their goals of Share the Ohio Story, Strengthen our Strengths, Cultivate Top Talent, Invest in our Regional Assets and Focus on our Customers to the OVRDC region and the CEDS.

Goal 1: Share the Southern Ohio Story.

Objective 1: Improve the perception of Southern Ohio by business executives and site selection consultants both in and outside of Southern Ohio to increase the economic growth of the region.

Strategy 1: Encourage development of marketing plan for the region.

During 2011, OVRDC has been and is currently working with the Foundation for Appalachia Ohio (FAO), the Ohio Appalachian Business Council (OABC), and the Appalachian Partnership for Economic Growth (APEG) in the submission of the APEG response to the JobsOhio Request for Proposal for establishing a 25 county regional private-sector operated economic development group. APEG will provide a primary point of contact for lead management for JobsOhio, ensure available properties are aligned with the State's database; identify opportunities where the region's assets fulfill outside company needs; develop a clear message for collective marketing and utilize regional businesses in identifying and assisting with leads. To avoid duplication and dilution of effort, APEG will coordinate the economic development responses as the primary contact for lead management. In addition, APEG will build on efforts by the Local Development Districts to ensure all economic development properties in the region are inventoried. APEG will articulate the region's competitive advantages and attractions messages, likely to include unifying regional messages as well as sub-regional and economic "cluster" messages. These messages will be crafted with significant input of business and economic development practitioners, as well as from JobsOhio, to ensure alignment and mutually reinforcing messages. A first step is for APEG to bring businesses together within the region in similar industries along with corresponding industry trade groups to lead cluster development strategies. The OABC – which is likely to grow exponentially in membership - will encourage business leaders in the OABC's networks around the world to consider an investment in southeastern Ohio. APEG will work simultaneous on long-term and near-term attraction strategies, as described above, while creating a climate rich for successful business attraction.

Strategy 2: Develop and maintain a website to market the region's industrial sites and strengths, such as labor force, education and incentives.

In 2009, OVRDC staff developed and submitted a grant application to HUD for funding through the Rural Housing and Economic Development (RHED) program to create, update and maintain a regional marketing website to market the region's industrial sites to potential companies and site selection consultants from around the world. Unfortunately, the application was not selected for HUD RHED funding. In 2010, OVRDC staff developed and submitted a grant application to USDA Rural Development through the Rural Business Opportunity Grant (RBOG) program to again create, update and maintain a regional marketing website to market the region's industrial sites to potential companies and site selection consultants from around the world. OVRDC was not successful in obtaining this grant.

In 2011, OVRDC staff began to compile information and establish local community contacts for the RCDI commercial property database. This database will include information on buildings and building sites available for sale or lease in the counties of Gallia, Jackson, Pike and Vinton.

As stated above, OVRDC has been and is currently working with the Foundation for Appalachia Ohio (FAO), the Ohio Appalachian Business Council (OABC), and the Appalachian Partnership for Economic Growth (APEG) in the submission of the APEG response to the JobsOhio Request for Proposal for establishing a 25 county regional private-sector operated economic development group. APEG plans to build on efforts by the Local Development Districts to ensure all economic development properties in the region are inventoried.

Strategy 3: Contact and gain attention of five site selection consultants.

In 2009, OVRDC staff developed and submitted a grant application to HUD for funding through the Rural Housing and Economic Development (RHED) program to conduct a 'mock' company site visit by a site selection consultant with eight of our member counties and perform an analysis of each county's response, sites and overall preparedness. Unfortunately, the application was not selected for HUD RHED funding. In 2010, OVRDC staff developed and submitted a grant application to USDA Rural Development through the Rural Business Opportunity Grant (RBOG) program to conduct a marketing campaign to reach site selection consultants, as well as, companies in the industry sectors targeted in the State of Ohio's Strategic Plan and OVRDC's Comprehensive Economic Development Strategy to promote the regional marketing website to. OVRDC was not successful in obtaining this grant.

As stated above, OVRDC has been and is currently working with the Foundation for Appalachia Ohio (FAO), the Ohio Appalachian Business Council (OABC), and the Appalachian Partnership for Economic Growth (APEG) in the submission

of the APEG response to the JobsOhio Request for Proposal for establishing a 25 county regional private-sector operated economic development group. APEG will articulate the region's competitive advantages and attractions messages, likely to include unifying regional messages as well as sub-regional and economic "cluster" messages. These messages will be crafted with significant input of business and economic development practitioners, as well as from JobsOhio, to ensure alignment and mutually reinforcing messages. A first step is for APEG to bring businesses together within the region in similar industries along with corresponding industry trade groups to lead cluster development strategies. The OABC – which is likely to grow exponentially in membership - will encourage business leaders in the OABC's networks around the world to consider an investment in southeastern Ohio.

Strategy 4: Encourage area residents to join the Ohio Ambassador Program in order to promote Southern Ohio and Ohio. Also, form a "Southern Ohio Ambassadors" to further promote region.

In August 2009, OVRDC informed its Executive Committee members at their regular meeting about the Ohio Ambassador Program, which was an integral part of the Ohio Department of Development's Strategic Plan to promote our state by encouraging citizens to "Share the Ohio Story." Working cooperatively with the Association of Ohio Commodores, OVRDC tried to plan a regional event to promote the Ohio Ambassador Program in 2009 and 2010. With the change in governor in Ohio, OVRDC is under the impression the Ambassador Program has ceased to exist.

Strategy 5: Increase the number of Appalachian companies competing for and winning Export Awards.

On August 26, 2009, OVRDC staff attended the 2009 Governor's Excellence in Exporting Awards Program in Columbus, Ohio. Twenty-seven companies and organizations received awards including Freeman Schwabe Machinery from Batavia, Ohio.

OVRDC has used its e-newsletter to spread the word about nominating companies for the Governor's Export Awards. Most recently, the 2011 competition was featured in our July 29, 2011 edition.

Responsibility: OVRDC, County E.D. Officials

Outcomes:

1. Regional marketing plan developed
2. Regional Website developed and maintained
3. At least five site selection consultants contacted
4. At least one site visit by a site selection consultant
5. At least one Ambassador from each county

6. At least two Appalachian companies entering Export Awards Contest.

Objective 2: Improve the perception of Southern Ohio as a tourist and residential destination to tourism industry officials and residents, both inside and outside of Southern Ohio.

Strategy 1: Coordinate the development and/or compiling of “Theme” Tours throughout region with mapping and routing available online and encourage marketing by counties to potential visitors, including international visitors.

OVRDC has been working cooperatively with the Appalachian Adventure Trail (AAT) for several years and continued that cooperation in 2009 and 2010. The AAT’s accomplishments and activities in 2009 included the addition of Morgan County, a sponsorship drive, attending the 2009 Appalachia Spotlight Show, and new content to the AAT website. The AAT’s accomplishments and activities during 2010 included the completion of the new trail maps, the designing and printing of a new brochure, and the creation of a sustainability plan.

In 2009, 2010 and 2011, OVRDC completed major map revisions to the Adams County Visitors’ brochure map upon request from Tom Cross, Executive Director of the Adams County Travel & Visitors Bureau.

Strategy 2: Develop and make available to counties educational training for local officials, key businesses (hotels, convenience stores, etc.) and volunteers.

On June 7, 2011, OVRDC staff held a meeting in McArthur, Ohio with local governmental officials in Vinton County to discuss utilization of tourism resources in order to promote entrepreneurship in the tourism industry. Topics included how to market the area to potential tourists visiting the nearby Hocking Hills region and how to encourage residents to tap into the tourism resource for businesses, thus attracting more visitors to the area. Information about entrepreneurial programs and the Vinton County Convention and Visitors Bureau was shared with the communities.

Southern State Community Colleges has added several new programs to support small business and entrepreneurs to meet local needs:

- Entrepreneurship - 429E -- Associate of Applied Business Degree:
<http://www.sccc.edu/academic/degree-programs/associates/entrepreneurship.html>
- Entrepreneurship - 429F -- Certificate Program
<http://www.sccc.edu/academic/degree-programs/certificate/entrepreneurship.html>
- Electromechanical Engineering - 470A -- Associate of Applied Science Degree

<http://www.sccc.edu/academic/degree-programs/associates/electromechanical-engineering.html>
Some of these courses will be offered in the evenings at Manchester High School.

- Food Processing and Technology Major - 441B -- Associate of Applied Science Degree
<http://www.sccc.edu/academic/degree-programs/associates/food-processing-technology.html>

Enterprise Facilitator - The Highland County Chamber of Commerce and Southern State Community College received a grant to fund the employment and development of an Enterprise Facilitator and local business advisory group to facilitate entrepreneurs in their efforts to start up new businesses.

The Enterprise Center of Southern State continues to serve as an entrepreneur and small business support center in Winchester. The Center is staffed by a Certified Business Advisor®, and offers FREE consulting and referral services to pre-venture, start-up, or existing businesses.

Strategy 3: Continue to support AppalachiaOhio.com to market region.

The Ohio Valley Regional Development Commission (OVRDC) continues to work in partnership and cooperation with the Ohio University Voinovich School for Leadership and Public Affairs on many items including the AppalachiaOhio.com (aka FirstOhio.com) website. Although the Voinovich School lost funding to continue upkeep of the site, it still hosts the site and keep tourism and business data available on the site. With the creation of the Appalachian Partnership for Economic Growth (APEG), new marketing efforts will begin and the fate of the AppalachiaOhio.com website is uncertain.

Strategy 4: Encourage participation in the Ohio Ambassador Program.

In August 2009, OVRDC informed its Executive Committee members at their regular meeting about the Ohio Ambassador Program, which was an integral part of the Ohio Department of Development's Strategic Plan to promote our state by encouraging citizens to "Share the Ohio Story." Working cooperatively with the Association of Ohio Commodores, OVRDC tried to plan a regional event to promote the Ohio Ambassador Program in 2009 and 2010. With the change in governor in Ohio, OVRDC is under the impression the Ambassador Program has ceased to exist.

Strategy 5: Facilitate meetings with Tourism Directors to survey needs and encourage cooperation.

Nothing to report on at this time.

Responsibility: OVRDC, County Tourism Directors

Outcomes:

1. List of “Theme” tours compiled
2. Tourism training materials developed and made available
3. One Ambassador identified for each county
4. Number of visitors to Southern Ohio increased by 5%.

Goal 2: Strengthen Our Strengths.

Objective 1: Retain and strengthen our existing businesses and industries to retain our current job base.

Strategy 1: Conduct baseline Retention and Expansion Study in each OVRDC county.

In 2009, OVRDC staff developed and submitted a grant application to HUD for funding through the Rural Housing and Economic Development (RHED) program to purchase retention and expansion software program called Synchronist which would have aided the OVRDC counties in putting into place a formal retention and expansion program to track current problems, spot trends and generate a myriad of reports to keep local officials on top of the economic situation in their county, region and state, as well as see how they compare on a national and global level. Unfortunately, the application was not selected for HUD RHED funding. In 2010 through a contract with the Ohio University Voinovich School of Leadership and Public Affairs, OVRDC did move forward with the purchase of the Synchronist software to assist Jackson County with a formal retention and expansion effort. OVRDC now has the software to offer this service to all of its counties.

In 2011, OVRDC partnered with the Ohio State University South Centers Business Development Network, Workforce Development Area 1, and other regional partners to establish a Business Assistance Network which worked to address and implement a strategic business retention and early warning program to the ten counties of Region 7, located within the OVRDC district: Adams, Brown, Gallia, Highland, Jackson, Lawrence, Pike, Ross, Scioto, and Vinton.

The Region 7 Business Assistance Network aligned regional resources such as: economic development agencies, chambers of commerce, educational institutions, and workforce development to provide a platform for unified delivery of services and assistance to our regional businesses. The goal of this Network was to build an infrastructure that supports a systematic approach to business assistance by bridging the gap between business needs and available resources.

According to the Small Business Administration, seven-out-of-ten new firms survive at least two years, one-half survive at least five years, a third at least ten years, and only a quarter stay in business fifteen years or more. Normally, these

companies in the five year establishment range have acquired ten or more employees. This trend led to the Network identifying the following target industries: 10-25 employee manufacturers and healthcare companies and 5-10 employee businesses. The Business Assistance Network's goal was to provide assistance to these companies so they can surpass this statistical survival trend.

The Business Assistance Network received fifty company surveys with 45 proposals returned to those businesses identified as "at risk." The main indicator for the "at risk" status was succession planning. Most small businesses do not appropriately plan for succession. The Ohio State University South Centers in conjunction with OSU Extension Community Development is building a curriculum to address succession planning for business retention in southern Ohio. The program will address preparation of new entrepreneurs to purchase existing businesses and preparing existing business owners for sale of the company and/or transition of the management. The program will be launched in early 2012.

Strategy 2: Link industries with available and appropriate resources, such as training, funding sources, etc. (Identified by R&E Study)

The 2011 Early Warning Network initiative that was executed by OVRDC in conjunction with OSU South Centers, Workforce Development Area 1, and other entities identified the following business needs: Better and more technologically advanced infrastructure, including the availability of high-speed internet and cellular telephone service in underserved areas, desire for upgrades in transportation-related infrastructure, including improved roads and better access to airline cargo service, business succession planning, ready access to new technology and support in adapting to that technology, and access to a better-qualified workforce.

Efforts are underway to combat these obstacles. OSU South Centers in conjunction with OSU Extension Community Development is building a curriculum to address succession planning for business retention; the Connecting Appalachia project will increase availability for high-speed internet service; Workforce Development Area 1 continues to offer worker training programs; and OVRDC continues efforts to facilitate infrastructure projects through various funding sources for the betterment of communities and survival of businesses in Region 7.

Strategy 3: Develop resource guide/website for companies with information on available programs, funding sources, etc.

In 2011, OVRDC staff began to make contacts and gather information in order to improve OVRDC's existing loan database and publish it to a website as a searchable resource. In addition to the information available on loans in the region, information on the Southern Ohio Agricultural & Community

Development Foundation grant to assist communities adversely affected by the loss of tobacco-related industry will be available.

Responsibility: OVRDC, County E.D. Officials, Chambers

Outcomes:

1. R&E survey completed and analyzed in each county
2. Information meeting/seminar held for companies
3. Resource/Information guide developed and maintained
4. At least 200 jobs retained and 100 jobs created.

Objective 2: Use existing industries to determine possible target industries for attraction, such as similar or compatible industries and supply chain companies to create new jobs.

Strategy 1: Use R&E study to gather information, analyze and provide information back to economic development officials.

On August 10, 2011, OVRDC staff attended the Positioning Appalachia conference hosted by the Ohio University's Voinovich School in Athens, Ohio. OVRDC staff and staff of The OSU South Centers participated in a panel and presented information on the Early Warning Network and discussed the findings with various government and economic development officials attending the conference.

Strategy 2: Determine if existing companies' products can be utilized or adapted to "green" industry sector.

Nothing to report on at this time.

Strategy 3: Assist companies with the conversion to green energy.

Nothing to report on at this time.

Responsibility: OVRDC, County E.D. Officials, Companies

Outcomes:

1. Analysis completed to determine industries to target
2. Workshop for Southern Ohio companies held to explore manufacturing and supply needs of "green" industries
3. Five companies assisted with converting to greener technology.

Objective 3: Continue to support small businesses and entrepreneurs.

Strategy 1: Provide "clearinghouse" of information needed for entrepreneurs and small businesses.

In 2011, OVRDC staff began to make contacts and gather information in order to improve OVRDC's existing loan database and publish it to a website as a

searchable resource. In addition to the information available on loans in the region, information on the Southern Ohio Agricultural & Community Development Foundation grant to assist communities adversely affected by the loss of tobacco-related industry will be available. OVRDC staff also began to compile information and establish local community contacts for the RCDI commercial property database. This database will include information on buildings and building sites available for sale or lease in the counties of Gallia, Jackson, Pike and Vinton to provide information for entrepreneurs and small businesses looking to start-up or expand in the area.

Strategy 2: Facilitate connections between businesses, government and education to bridge current disconnect among them.

On February 25, 2010, the Southern Ohio Procurement Outreach Center “Government Marketing 101: An Introduction to Government Procurement” workshop was held. This workshop provided business owners an overview of the government procurement process. Topics included small business designations, contracting resources, detail of the contracting process, funding opportunities, the bid process, subcontracting, and working with specific agencies.

On March 9, 2010, the Minority Contractors Business Assistance Program workshop sponsored by PIDC’s Ohio Valley Minority Business Association was held. The theme of the workshop was “Turn Around Ohio – Business Must Be The Number One Priority in 2010.”

On April 7, 2010, the Southern Ohio Procurement Outreach Center workshop for small business owners on “Doing Business with the Ohio Department of Transportation” was held.

On May 19, 2010, the WesBanco CDC “Pitch Your Plan” 2010 Business Plan Competition hosted by the OSU South Centers in Piketon was held. The competition winners of the ten county region were announced during this event.

On July 30, 2010, OVRDC staff attended a Business Development Team meeting at OSU South Centers at Piketon. The purpose for attending the meeting was to introduce Jessica Purdon, the new Economic Development Specialist.

On October 8, 2010, OVRDC staff attended the Small Business Workshop held at the University of Rio Grande. Staff gave a presentation regarding OVRDC’s Revolving Loan Fund and answered questions from the audience.

Southern State Community Colleges has added several new programs to support small business and entrepreneurs to meet local needs:

- Entrepreneurship - 429E -- Associate of Applied Business Degree:
<http://www.sccc.edu/academic/degree-programs/associates/entrepreneurship.html>

- Entrepreneurship - 429F -- Certificate Program
<http://www.sccc.edu/academic/degree-programs/certificate/entrepreneurship.html>
- Electromechanical Engineering - 470A -- Associate of Applied Science Degree
<http://www.sccc.edu/academic/degree-programs/associates/electromechanical-engineering.html>
Some of these courses will be offered in the evenings at Manchester High School.
- Food Processing and Technology Major - 441B -- Associate of Applied Science Degree
<http://www.sccc.edu/academic/degree-programs/associates/food-processing-technology.html>

Enterprise Facilitator - The Highland County Chamber of Commerce and Southern State Community College received a grant to fund the employment and development of an Enterprise Facilitator and local business advisory group to facilitate entrepreneurs in their efforts to start up new businesses.

The Enterprise Center of Southern State continues to serve as an entrepreneur and small business support center in Winchester. The Center is staffed by a Certified Business Advisor®, and offers FREE consulting and referral services to pre-venture, start-up, or existing businesses.

Strategy 3: Continue operation of OVRDC RLF fund and coordination of Regional Business Assistance Network

OVRDC provides ongoing outreach meetings with potential loan applicants. During this reporting period, the RLF Coordinator provided technical assistance to approximately **33** entrepreneurs interested in starting and/or expanding their business.

Responsibility: OVRDC, County E.D. Officials, Chamber Officials

- Outcomes:**
1. Resource Clearinghouse/Data Base developed and maintained
 2. Meeting facilitated between business and government leaders
 3. RLF continued with at least 1 new loan.
 4. At least 25 jobs retained and 10 jobs created.

Objective 4: Determine and build upon OVRDC's core strengths to grow the agency.

Strategy 1: Determine OVRDC's strengths.

OVRDC, through the development of its 2009 CEDS, has had the opportunity to identify its strengths. The 2009 CEDS lays a roadmap with goals, objectives and

strategies that OVRDC can attempt to accomplish over the next three years. It considers the staff's strengths and identifies strategies within our range of expertise.

Strategy 2: Maintain core programs and explore additional funding to expand upon them.

OVRDC has maintained its core programs including Appalachian Regional Commission (ARC), Economic Development Administration (EDA), and Ohio Public Works Commission (OPWC) project technical assistance and review. It has maintained a commitment to administer Community Development Block Grant (CDBG) projects for communities within the region, has continued its Geographic Information System (GIS) technical assistance, and has continued its focus on entrepreneurship and small business development through our Revolving Loan Fund and Project LEAD funded through USDA Rural Development. Efforts have been made over the past few years to secure grants and contracts to expand our technical assistance in many of these areas. Grant applications to EDA, HUD, and USDA Rural Development have been developed and submitted. Two different EDA grants in the amount of \$150,000 each (\$300,000 total) were secured to support our efforts to assist with economic recovery in Clinton, Fayette, and Highland Counties in response to the DHL Airpark closure in Wilmington, Ohio. The HUD and USDA Rural Development grants were denied. Contracts have been secured with the Ohio University Voinovich School for Leadership and Public Affairs to assist with a local economic development planning project in Jackson County, and we have secured five CDBG administration contracts with local communities in the region.

Strategy 3: Explore internships with area colleges to provide students to compile needed information and develop data bases, etc. as identified above.

Nothing to report on at this time.

Responsibility: OVRDC

- Outcomes:**
1. OVRDC Strengths identified
 2. Core programs maintained and/or expanded;
 3. Intern obtained to help with data compilation

Goal 3: Cultivate Top Talent

Objective 1: Retain, train and advance our existing workforce—white, blue and green collar workers and recruit the best new workforce available for the future.

Strategy 1: Identify needs of business (R&E Study)

The 2011 Early Warning Network initiative that was executed by OVRDC in conjunction with OSU South Centers, Workforce Development Area1, and other

agencies identified a need for a more skilled workforce, and a need to improve the employability of the unskilled labor force. Problems that continue to be addressed include worker training, low employee work ethic, and lack of employability due to an inability for many workers to pass drug screenings. OVRDC continues to offer support for programs and agencies focused on improving the workforce and addressing community issues that directly affect the workforce.

Strategy 2: Facilitate dialogue between business and education and government.

The Highland County Chamber of Commerce and Southern State Community College sponsored two “Coffee and Commerce” events bringing together educators, business leaders and legislators from local, state and federal levels for informal discussion.

Great Oaks Career and Technical Centers, UC Clermont, U.S. Grant Career and Technical Center, and Southern State Community College sponsored an Economic Forecast Breakfast hosted by the Clermont Chamber of Commerce. This has become an annual event featuring national renowned economic forecaster, Brian Beaulieu. Nearly 300 people from business, government, and education attend this event.

The Highland County Chamber of Commerce sponsored its annual Legislative Forum featuring presentations by the Ohio Chamber of Commerce and legislators on issues facing business and education leaders.

Strategy 3: Build upon existing educational strengths and resources.

Southern State Community Colleges has added several new programs to train and retrain the workforce in the OVRDC region including:

- Entrepreneurship - 429E - Associate of Applied Business Degree
- Entrepreneurship - 429F - Certificate Program
- Electromechanical Engineering - 470A - Associate of Applied Science Degree
- Food Processing and Technology Major - 441B - Associate of Applied Science Degree

Adult Basic Literacy and GED Preparation - Southern State Community College continues to expand its Adult Basic Literacy Program and GED preparation throughout the region. A recent grant awarded by the Dollar General Foundation will enable expanded offerings in the villages of Manchester and West Union in Adams County.

Educational Partnership - Southern State Community College is partnering with local schools to provide college-level general education courses to high school

and adult students on the local high school and Career and Technical campuses throughout the Southern State region.

University Alliance Continuing Education - Developed by Villanova University, University of San Francisco, and Tulane University, these professional education programs and interactive courses explore today's most in-demand business topics. Programs include such topics as Project Management, IS Security, ROI Methodology, Supply Chain Management, Business Marketing, and many more. Registration is through Southern State Community College's Corporate and Community Services division. Courses can be accessed from homes with high-speed Internet connections or can be accessed at any Southern State campus.

Truck Driving Academy - The Truck Driving Academy of Southern State Community College provided CDL training for a growing employment need. 335 people completed the training last year.

Strategy 4: Conduct Wage and Benefit Survey to help in promotion of our workforce to potential companies.

Nothing to report on at this time.

Strategy 5: Work with state and local Job and Family Service offices and One-Stop Centers to facilitate needed training programs linking workers and companies with educational institutions.

The One-Stops in the OVRDC area that are offering or had offered programs to connect employers, workers, and training institutions since October 2009 were the Pike County One-Stop and the Lawrence County One-Stop. The Pike County One-Stop had a program working with Glatfelter and Ohio University in Chillicothe and had between 600 and 700 participants that resulted in 2172 trainings. The Lawrence County One-Stop had a program working with the Leibert Corporation to connect employees to various training institutions offering commercial driver's license training in order to upgrade their certifications. About 150 employees participated.

In 2011, OVRDC partnered with Workforce Development Area 1, the Ohio State University South Centers and other regional partners to establish a Business Assistance network which worked to address and implement a strategic business retention and early warning program to the ten counties of Region 7: Adams, Brown, Gallia, Highland, Jackson, Lawrence, Pike, Ross, Scioto and Vinton.

The Region 7 Business Assistance Network aligned regional resources such as: economic development agencies, chambers of commerce, educational institutions, and workforce development to provide a platform for unified delivery of services and assistance to our regional businesses. The goal of the Network was to build an

infrastructure that supports a systematic approach to business assistance by bridging the gap between business needs and available resources.

Workforce development office staff did field work to collect data to be input into the Synchronist system, licensed to OVRDC, and delivered that data to the OVRDC office where staff created and maintained the electronic online files on the participating businesses. Staff at the Ohio State University South Centers was then able to access and process that data in order to identify area business needs and identify individual businesses that were at-risk of closing or moving from Region 7. The South Centers were then able to offer business support and educational resources tailored to the needs of those at-risk businesses.

Responsibility: OVRDC, Business Leaders, Education Leaders, One-Stop Centers, County CIC, E.D. and Chamber officials.

Outcomes:

1. R & E Study completed in each county.
2. Regional meeting held with business and education leaders and government officials to discuss needs identified in R&E Study
3. Wage and Benefit Survey conducted, results provided to area E.D. officials
4. At least 50 workers per county receive training
5. At least 15 companies assisted with training needs

Goal 4: Invest in Our Local/Regional Assets

Objective 1: Improve our communities' existing physical assets.

Strategy 1: Work to make broadband available and affordable to all residents and businesses in region.

In late 2008, discussions began about the possibility of a multi-county initiative to get broadband access to most areas of Appalachia Ohio. Three of Ohio's Local Development Districts (OVRDC, Buckeye Hills-Hocking Valley Regional Development District, and the Ohio Mid-Eastern Governments Association) were asked to join early in the project's development to provide regional support. The Ohio Local Development Districts were instrumental in securing support from their member counties for the project.

In 2009, the Southern Ohio Health Care Network (SOHCN) made application through the U.S. Department of Commerce (DOC) National Telecommunications and Information Administration (NTIA) requesting almost \$189 million for the Connecting Appalachia Initiative. This project offered a comprehensive and sustainable plan to expand broadband availability across 34 underserved rural Ohio counties (29 in Ohio Appalachia). Based on an innovative technology package and carrier partnerships, the project would have delivered metropolitan-

class broadband in local communities, residential fixed-wireless broadband in the rural expanse of the region, and mobile data services for first responders.

In early 2010, the SOCHN was notified by the USDOC NTIA that its application was not selected for funding for the first round of American Recovery and Reinvestment Act (ARRA) broadband funding.

Despite this news, OVRDC staff continued to work in cooperation with Horizon and Reid Consulting Group to submit a second round application to the U.S. Department of Commerce, National Telecommunications and Information Administration (NTIA) for funds to develop a middle-mile fiber backbone infrastructure. Horizon was successful in securing \$66 million in NTIA funds and will match it with their own resources of \$28 million. OVRDC has formed a Broadband Committee to assist Horizon with the deployment of the fiber in the region. This is a major project for the Appalachian Ohio region and greater broadband access is a common need identified by all of OVRDC's member counties. Construction on the project began in 2011.

Strategy 2: Provide technical assistance to communities to identify both new and existing (maintenance/replacement) water and sewer infrastructure needs and link them to funding sources.

The City of Hillsboro WWTP Expansion and By-pass Elimination project consists of the construction and increase in capacity of the existing WWTP to 6 mgd. The outcome is the retention of 1,800 jobs. (ARC - \$250,000, OPWC - \$660,000, TPC - \$17,186,134)

The Pike County Manufacturing Center Improvement project consists of installing 13,000 lf of sanitary sewer and 4,200 lf of public roadway to improve a 700-acre site. The outcome is the development of a 700-acre industrial, technological, and commercial site. (ARC - \$250,000, TPC - \$3,266,000)

The City of Portsmouth Water System Pump Upgrades project consists of the replacement of valves, piping, two high service pumps, variable speed drives, and controls for the filtration plant. The outcome is the retention of 264 employees at Pepsi-Cola Bottlers Central Division. (ARC - \$150,000, TPC - \$406,350)

The Richmond Dale Sanitary Sewer and WWTP project consists of the construction of central sanitary sewer and a 30,000 gpd WWTP. The outcome is safe, reliable sanitary sewer to 172 households and several businesses which will retain 28 jobs. (ARC - \$250,000, TPC - \$2,378,000)

The Village of Coalton/Coal Township Wastewater Improvements project consists of a new wastewater treatment plant, collection system improvements. The outcome is 334 customers in the Village of Coalton and Coal Township will

have adequate wastewater collection and treatment facilities and 50 jobs will be retained. (ARC - \$250,000, OPWC - \$650,000, TPC - \$3,464,000)

The Village of Frankfort Water System Improvements consists of the replacement of a majority of the waterlines within the village, new fire hydrants, replacement of existing water meters, and the replacement of the existing water tank with a 450,000 gallon standpipe. The outcome is safe, reliable water to 442 households and many businesses which will retain 242 jobs. (ARC - \$ 250,000, OPWC - \$700,000, TPC - \$3,775,650)

The Lawshe Waterline Extension project consists of the installation of 36,000 feet of 6" waterline, 50,300 feet of 4" waterline and 50,300 feet of 3" waterline as well as associated valves, hydrants, service connections and other appurtenances. The outcome is 150 households and several businesses will be served with safe, reliable and affordable source of potable water. This project will create 6 new jobs. (ARC - \$250,000, OPWC - \$425,000, TPC - \$2,090,650)

The Richland/Jackson Townships Waterline Extension project consists of the installation of 9,000 lf of 6" waterlines. The outcome is 52 households will have safe, reliable and affordable source of potable water. (ARC - \$250,000, TPC - \$313,000)

The Village of Hamden Sludge Handling project consists of a new building and installation of a belt filter press to press sewer sludge into a cake that can be hauled to a landfill. The outcome is 394 households will have lower sanitary sewer rates and the village will save approximately half of what they pay in a year which is \$28,800. (ARC - \$250,000, TPC - \$350,000)

The Village of Leesburg Water Supply Improvement project consists of replacing a well as well as adding an additional well that will when running simultaneously with other wells. The outcome will satisfy OEPA requirements in order to supply to their standards. (OPWC - \$251,865, Local - \$27,985)

The Village of South Point Water Distribution Rehabilitation Project consists of replacement of 5,800 linear feet of 8-inch waterline, 22 valves, 15 system connections, 85 service connections and 2,125 feet of service waterline and pavement restoration. The outcome will protect the health and welfare of the systems water customers. (OPWC - \$294,085, Local - \$92,230)

The Northwest Regional Water – Dry Run Tank Project consist of replacement of an existing 30,000 gallon storage tank to a 100,000 gallon above ground water storage tank. The outcome will meet the OEPA standards of a minimum tank of 95,200 gallons to accommodate 238 customers in the area. (OPWC - \$116,250, Local - \$116,250)

The Village of Oak Hill Water Systems Project consists of replacing 22,500 lf of waterlines, fire hydrants, and valves in the village's water distribution system. (ARC - \$250,000, OPWC - \$608,200, TPC - \$1,018,200)

The Village of Georgetown Possum Run Pump Station SSO Elimination Project consists of the construction of a wet weather high flow pump works and storage basin to eliminate the sanitary sewer overflows. (ARC - \$250,000, TPC - \$1,200,000)

The Village of Coalton Water Distribution System Renovations Project consists of replacing 43,000 lf of 3", 4" and 8" waterlines, 88 gate valves, 265 service reconnections, and 32 flush hydrants. (ARC - \$250,000, OPWC - \$600,000, TPC - \$1,850,000)

The Fairview, Hutt, and Benson Road Waterline Project consists of the installation of 5,100 lf of 6" waterline and 17,600 lf of 4" waterline. (ARC - \$250,000, TPC - \$313,000)

The Village of Piketon Water System Improvements Project consists of the construction of a 400,000 gallon water storage tank and valve vault, pump station rehabilitation, and the installation of 7,500 feet of waterline. (ARC - \$250,000, OPWC - \$340,000, TPC - \$1,115,000)

The Zaleski Water Main Replacement Project consists of the construction of 3,250 lf of water mains replacement. (ARC - \$98,400, TPC - \$123,000)

The City of Greenfield North/North Eighth Street Waterline Replacement Project consists of 4,066 linear feet of 6 inch waterline to replace existing 2 and 4 inch waterline, 6 fire hydrants and 6 gate valves, 47 water meters and curb stops. Excavation, mobilization, aggregate base, subgrade compaction, asphalt replacement, seeding and mulching. (OPWC - \$385,605, Local \$50,000 TP - \$435,605)

The Village of Georgetown Town Run Pump Station SSO Elimination/WWTP Improvements consists of improvements to the existing WWTP including 2,400 LF of 24" relief sewer, 400 LF of 18" relief sewer, one pump station, one 2 million gallon prestressed concrete tank and one backup generator and switchgear. (OPWC \$1,000,000 secured, other funds being sought for a TPC of \$7,300,000)

The Village of Sardinia Water Main Improvements Project consists of replacement of 1,555 LF of water main and appurtenances. (OPWC - \$116,302, OWDA \$12,922, TPC - \$129,224)

The Village of Crown City Wastewater Facilities Improvements Project consists of construction of a sanitary sewage collection system and 50,000 gallon per day

activated sludge extended aeration package treatment plant. (OPWC \$858,000, other funding being sought for a TPC of \$4,600,000)

The Village of Bloomingburg Sewer Separation Improvement Project consists of constructing a new 8” storm sewer to remove storm water flows from the existing sanitary sewer in certain areas. (OPWC - \$169,740, OWDA \$56,580, TPC \$226,320)

Responsibility: OVRDC, Communities, Elected Officials, Connecting Appalachia

Outcomes:

1. Affordable broadband available to all of Southern Ohio
2. Technical assistance provided to 25 communities/counties
3. At least 20 infrastructure projects funded and completed.

Objective 2: Aid communities in the development of dedicated plans to handle future infrastructure maintenance and growth needs.

Strategy 1: Assist communities in conducting an inventory of existing infrastructure and developing 5 year capital improvement planning.

In September, 2010, OVRDC staff started work with the City of Greenfield to map the infrastructure of the city, which includes: storm sewer, sewer and water. OVRDC staff has been using a GPS unit to map their water meters, water valves, fire hydrants, wells, etc. Additionally, staff has been scanning historical engineering prints to create a data base of infrastructure that serves the community.

Responsibility: OVRDC, RCAP, Communities

Outcomes:

1. At least 5 communities assisted in completing a capital improvement plan.

Objective 3: Improve existing and develop new transportation systems.

Strategy 1: Promote designation of Rural Planning Organizations (RPO) to give rural governments a larger voice in infrastructure planning and provide a means of prioritizing projects on a regional basis.

OVRDC continues to support federal legislation that would recognize rural planning districts such as itself, Buckeye Hills-Hocking Valley Regional Development District, and Ohio Mid-Eastern Governments Association as Rural Planning Organizations (RPO) with input into major transportation investments in the region.

Strategy 2: Promote completion of Appalachian Development Highway System in OVRDC region.

OVRDC supports the completion of the Portsmouth By-Pass, which is a part of the Appalachian Development Highway System. No meetings about the By-Pass have been held to our knowledge recently to keep us updated on the project's status.

Strategy 3: Work to secure additional funding for our region's highways.

In early part of 2010, OVRDC staff completed the S.R. 32/U.S. 50/U.S. 35 Corridor Study. The focus area for this study was a 5-mile radius (10-miles total) along S.R. 32/U.S. 50/U.S. 35 through Adams, Athens, Brown, Clermont, Gallia, Highland, Jackson, Meigs, Pike, Ross, Vinton and Washington counties. OVRDC was awarded a grant from the Ohio Department of Development, Governor's Office of Appalachia, for this project to conduct an Economic Corridor Study & Plan for S.R.32/U.S. 50/U.S. 35. The major purpose of this study and planning effort was to maximize the economic development potential of the S.R. 32/U.S. 50/U.S. 35 corridor to create new jobs in southern and southeastern Ohio. This goal was addressed through doing a comprehensive study of the corridor that will ascertain current demand on the corridor by existing major employers and other major trip generators and potential future generators, such as existing industrial parks and commercial sites. The study also shows an inventory and maps existing water and sewer infrastructure that is available along the corridor. In addition, the corridor plan will designate the best possible future industrial and commercial development sites in terms of access and available infrastructure, as well as designate environmentally sensitive areas. This report was presented to Ohio Department of Transportation, District 9 Office, so ODOT can proceed with a transportation study of the corridor. This report was also given to each county within the study area. Furthermore, the report and maps were posted to OVRDC's website.

The CR9 & McCarty Lane/U.S. 35 Grade Separation Projects consists of the construction of a two span bridge over U.S. 35 with total approach construction of approximately 1,100 feet. (ARC - \$300,000, TPC - \$5,019,000)

The Hobart/Carl Smith Drive Access Road Project consists of the construction of 4,325 feet of new road which will extend to S.R. 73. (ARC - \$680,000, TPC - \$3,373,610)

Strategy 4: Promote funding and development of intermodal facilities at strategic locations in region to encourage better utilization of rail and barge facilities throughout region.

OVRDC has been working with Lawrence County on further development of The Point Industrial Park and its intermodal facilities. A railroad spur connecting The

Point Industrial Park and its port facilities to the recently completed Norfolk Southern Heartland Corridor is a critical component that will allow our economic development goals to succeed. The project includes the construction of approximately 15,400 track feet of railroad spur and two safety crossings with flashers and gate arms. Lawrence County applied for FY'2011 Economic Development Administration funding and was considered a "competitive" project. They are working on improvements to the application and plan to re-submit in FY'2012.

Responsibility: OVRDC, Local Transportation Organizations (SEORC), Local Elected Officials.

Outcomes:

1. Official designation of RPO's
2. Regional transportation projects identified and prioritized
3. At least one OVRDC Appalachian Development Highway system project started and/or completed
4. At least one intermodal site identified and funding pursued.

Goal 5: Focus on Our Customers and Shareholders

Objective 1: OVRDC will become a more customer friendly and shareholder based organization and will improve its perception as a local development district to local, state and federal elected officials, economic development officials, business leaders, the media and the general public.

Strategy 1: Expand reach of E-newsletter and publish at least 4 times a year.

OVRDC established its e-newsletter in 2008 and has continued publication of the e-newsletter to present date. We have expanded the distribution of the e-newsletter to **470** individuals since its inception in 2008. The e-newsletter includes information about activities of OVRDC, project development information, and information about other grant sources and community/economic development related events. The e-newsletter was published **12** times in **2010** and has been published **8** times thus far in **2011**.

Strategy 2: Conduct more shareholder and legislative meetings.

The OVRDC Full Commission met twice in 2009, 2010, and 2011 (March and September). The Executive Committee met 10 times in 2009, met 9 times in 2010, and has met 10 times in 2011.

On February 2, 2010, the first OVRDC Congressional Team meeting was held at the OVRDC office. Those in attendance included David Hodapp of Senator Brown's office, Gary Abernathy and Nick Gatz of Senator Voinovich's office, Margaret Horst of Congressman Mike Turner's office, Phil Roberts of Congressman Charlie Wilson's office, Brad Young of Congressman Steve

Austria's office, and Cindy Cunningham of Congressman Zack Space's office. Staff met with these individuals to discuss the need of a new building for the OVRDC office, to discuss the need for better broadband access in the OVRDC region, to discuss concerns with our EDA Economic Development District and Economic Recovery Coordinator grant awards, and to discuss projects in the region they are aware of that we might be of assistance with.

On February 28-March 4, 2010, OVRDC staff and officers traveled to Washington, D.C. We attended the Development District Association of Appalachia (DDAA) Annual Conference, the National Association of Development Organizations (NADO) Washington Policy Conference, and met with legislators/staff on Capitol Hill. Legislative office visits included Congresswoman Jean Schmidt, Congressman Mike Turner, Congressman Charlie Wilson, Congressman Steve Austria, Congressman Zack Space, Senator George Voinovich, and Senator Sherrod Brown.

On March 5, 2010, OVRDC staff participated in a site visit at the Department of Energy (DOE) reservation in Piketon, Ohio with staff members from our various federal legislative offices. Attending were David Hodapp (Sen. Brown), Gary Abernathy and Nick Gatz (Sen. Voinovich), Stephen Caraway (Rep. Schmidt), Phil Roberts (Rep. Wilson), and Cindy Cunningham (Rep. Space). DOE set up the site visit which included a tour of the old gaseous diffusion plant and the American Centrifuge Project of USEC.

On October 12, 2010, OVRDC staff met with Danielle Namath of Senator Sherrod Brown's office. Danielle has taken the place of David Hodapp in serving as Senator Brown's contact for most of the OVRDC region. Staff met with Danielle to familiarize her with OVRDC.

On October 14, 2010, OVRDC staff was invited and participated in a roundtable discussion with Senator Sherrod Brown in Zanesville, Ohio about explore the next steps for moving forward in the drive to make Ohio the Silicon Valley of Green Energy. Discussion focused on developing the partnership between education and industry, and creating an favorable atmosphere to attract new businesses and foster entrepreneurship for the Appalachian region and included College Presidents, Economic Development and Business leaders, and Senator Sherrod Brown.

During the months of November/December, 2010, OVRDC prepared and planned to educate the newly elected governor's administration, and the existing and newly elected general assembly members about the Ohio Local Development Districts.

On November 29, 2010, OVRDC staff and officers met with State Senator Tom Niehaus to explain the impact the Ohio Local Development Districts have on economic development efforts in the Appalachian Ohio region. We also

discussed our concern about the future commitment to the Appalachia Ohio region by the State of Ohio.

On December 1, 2010, OVRDC staff attended the Economic Development Alliance of Southern Ohio's Insider/Outlook meeting in Chillicothe. In addition to participating in the regular program of the morning, staff was also able to meet with State Senator Elect David Daniels, State Representative Elect John Carey, and State Representative Elect Bob Peterson about the impact of the Ohio Local Development Districts and our concerns about the future of the development districts.

On December 13, 2010, OVRDC staff attended a Legislative Education Forum at Salt Fork Lodge near Cambridge, Ohio sponsored by the Eastern Ohio Development Alliance (EODA) again to highlight the impact of the Ohio Local Development Districts on economic development in Appalachia Ohio. Several new legislators from the eastern Ohio region were in attendance along with House of Representative Elect Bob Gibbs (18th-Ohio) and House of Representative Elect Bill Johnson (6th-Ohio). Each Ohio LDD provided an overview of our organization's work and impact.

On December 12, 2010, OVRDC staff had the opportunity to have dinner with House of Representatives Elect Bob Gibbs (18th-Ohio) and State Representative Dave Hall prior to the next day meeting of EODA.

In October, 2010, OVRDC staff formed the OVRDC GIS User Group. OVRDC GIS User Group is made up of the GIS users across the 12 counties that Ohio Valley Regional Development Commission serves. These GIS users include people from all expertise levels in the public, private, non-profit and educational sectors. This is an informal group that meets quarterly. The mission of the group: "The OVRDC GIS User Group is an informal group that promotes geographic data sharing, supports data standardization, and provides a network for the exchange of technical information between all Geographic Information System (GIS) users. Our goals include developing a forum for open discussion of GIS issues and fostering personal communication between GIS users of all skill levels in the public, private, non-profit and educational sectors." The group has met on November 9, 2010; March 8, 2011; May 10, 2011 and August 9, 2011, the next meeting is set for November 8, 2011. During these meeting OVRDC staff have different speaker come and present on GIS activities and topics that impact Ohio and the OVRDC Region.

Strategy 3: Improve follow-up response time to inquiries.

Nothing to report on at this time.

Strategy 4: Improve media relations by increasing the number of press releases provided to the media and scheduling visits to media outlets, when in counties.

OVRDC established a presence in social media with the publication of its Facebook page in 2011 which is continually maintained. Informational updates and links to all new E-newsletters are posted and are available to all “fans” of the page and Facebook users. A link to the Facebook page has also been placed on the home page of OVRDC’s website. Currently, OVRDC has over 50 active Facebook “fans.”

In May 2011, OVRDC updated and improved the format of their website (www.ovrdc.org) making it more user-friendly.

First Round County Caucus Meetings were held in each of the 12 OVRDC counties in January and February of 2010 and 2011. The Second Round County Caucus Meetings were held in April and May of 2010 and 2011. News releases were posted in each county newspaper and on the OVRDC web site prior to the meetings which are open to the public. Meetings of the OVRDC Full Commission were held in March and September of 2010 and 2011. Notices are released to each news outlets in our 12 counties and posted on our website. These meetings are open to the public.

Strategy 5: Improve relations with area business leaders by attending more Chamber of Commerce, CIC and Economic Development meetings/functions.

In 2011 OVRDC began to establish an entrepreneurship network in the counties of Gallia, Jackson, Pike and Vinton in accordance with the USDA RCDI grant. OVRDC staff has been attending more Chamber of Commerce events, networking with community members instrumental in economic development, and meeting regularly with development staff in the respective communities.

Strategy 6: Schedule and conduct regular meetings of economic development and business officials for a better understanding of their needs and to disseminate needed information to them from state and federal officials.

OVRDC staff work regularly with economic/business development officials. Annually, OVRDC conducts a project review committee meeting that brings economic development staff together to discuss projects and issues going on their counties. OVRDC is planning, at the request of our county economic development directors, more regular meetings with them to provide updates on activities in the region as well as new programs and directions of State of Ohio and the federal government. Our Congressional Team members will be invited to this meeting and for the future, meetings of these two groups will be combined.

On October 21, 2010, OVRDC staff conducted the OVRDC Economic Development meeting at OSU South Centers in Piketon, Ohio. Danielle Nameth from Senator Sherrod Brown's office spoke giving a recovery funds update. Other topics included: CEDS, EDA Project Process, Retention and Expansion Efforts, Stronger Economies Together (SET), and planning for future projects. There were 27 in attendance.

On March 9, 2011, OVRDC conducted an Economic Development meeting at the OVRDC office in Waverly, Ohio. Items discussed at the meeting included: Retention and Expansion Efforts; ARC/EDA FY'2011 Project Update; PortsFuture Presentation by the Voinovich School Staff; ODOD/GOA Update by Karen Fabiano, GOA Interim Director; and Economic Development Administration Update by Lee Shirey, Ohio EDA Representative. There were 20 participants.

Responsibility: OVRDC

- Outcomes:**
1. E-newsletter distribution increased by 10% and published minimum of four times per year
 2. Conduct an additional five shareholder meetings and two additional legislative meetings yearly
 3. Institute inquiry response time procedures
 4. Provide an additional four press releases per year and schedule at least two media visits per year
 5. OVRDC staff will attend at least one business function in each county per year.
 6. Conduct at least four meetings yearly of/for economic development officials.

Note: All outcomes are to be completed by December 31, 2012.

**RESOLUTION
OF THE
OHIO VALLEY REGIONAL DEVELOPMENT COMMISSION**

WHEREAS, the Ohio Valley Regional Development Commission has prepared a 2011 Comprehensive Economic Development Strategy (CEDS) Performance Report for submission to the U.S. Department of Commerce, Economic Development Administration, in compliance with the Public Works and Economic Development Act of 1965, as amended including the comprehensive amendment made by the Economic Development Administration Reauthorization Act of 2004; and

WHEREAS, the Ohio Valley Regional Development Commission has developed the Comprehensive Economic Development Strategy (CEDS) as its guiding plan and process to assist in alleviating the economic distress, unemployment and under-employment that have restricted economic growth in the District; and

WHEREAS, an approved CEDS Performance Report meets one of the requirements for continued designation as an Economic Development District and for qualifying the area to receive EDA federal assistance consistent with the District's objectives and priorities for locally initiated projects; and

WHEREAS, the CEDS Committee has reviewed and approved the CEDS Performance Report and member counties of the Ohio Valley Regional Development Commission have formally adopted the Comprehensive Economic Development Strategy as the basic guide for economic development within their counties.

NOW, THEREFORE, BE IT RESOLVED that the Executive Committee of Ohio Valley Regional Development Commission hereby authorizes the submission of the CEDS Performance Report to the U.S. Department of Commerce, Economic Development Administration for their review and approval.

BE IT FURTHER RESOLVED that a copy of the CEDS and this resolution will be forwarded to the Appalachian Regional Commission and to other appropriate agencies, member governments or other interested persons.

ADOPTED THIS 17TH DAY OF NOVEMBER 2011

Signed:

Robert L. Proud, Chairman

Witnessed:

John W. Hemmings III, Executive Director &
Commission Secretary

RESOLUTION

Resolution No: 2011-266
Date: 5-31-11

WHEREAS, The Adams County Board of Commissioners actively supports and currently participates in the economic development district activities of the Ohio Valley Regional Development Commission (OVRDC). OVRDC is a public regional planning commission within the State of Ohio, whose purpose is to influence favorably the future economic, physical, and social development of the twelve-county region through its regional development planning programs and technical assistance; and

WHEREAS, the Ohio Valley Regional Development Commission promotes a cooperative planning process involving local governments, public and private agencies, and individual citizens, toward improving their region within a democratic process; and

WHEREAS, the Adams County Board of Commissioners hereby endorses the 2011 Comprehensive Economic Development Strategy (CEDS), prepared by the Ohio Valley Regional Development Commission.

THEREFORE, BE IT RESOLVED, that the Adams County Board of Commissioners hereby authorizes an appropriation of funds in the amount of \$4,854.00 as participating local funds for the Ohio Valley Regional Development Commission to be used as part of the agency budget for the fiscal year beginning January 1, 2012. The appropriated funds to be paid on or after January 1, 2012, and

NOW, THEREFORE, BE IT FURTHER RESOLVED, the Adams County Board of Commissioners continues to support the Ohio Valley Regional Development Commission's Economic Development District planning partnership investment grant program with the USDOC Economic Development Administration for the annual performance period January 1, 2012 through December 31, 2012.

Mr. Justin Cooper moved the adoption of the Resolution and the motion was seconded by Grian Baldridge.

The Adams County Board of Commissioners hereby adopts this resolution on the 31st day of May, 2011.

Resolution No. 11- 169

The Highland County Board of Commissioners, Highland County, Ohio, met in Regular Session on July 13, 2011, with the following members present:

Shane Wilkin, Thomas Horst, and Jeremy Shaffer.

Mr. Horst moved the adoption of the following:

RESOLUTION

WHEREAS, the Highland County Board of Commissioners actively supports and currently participates in the economic development district activities of the Ohio Valley Regional Development Commission (OVRDC). OVRDC is a public regional planning commission within the State of Ohio, whose purpose is to influence favorably the future economic, physical, and social development of the twelve-county region through its regional development planning programs and technical assistance; and

WHEREAS, OVRDC promotes a cooperative planning process involving local governments, public and private agencies, and individual citizens, toward improving their region within a democratic process; and

WHEREAS, the Highland County Board of Commissioners hereby endorses the 2011 Comprehensive Economic Development Strategy (CEDS), prepared by OVRDC.

THEREFORE, BE IT RESOLVED, that the Highland County Board of Commissioners hereby authorizes an appropriation of funds in the amount of \$7,410.00 as participating local funds for OVRDC to be used as part of the agency budget for the fiscal year beginning January 1, 2012. The appropriated funds to be paid on or after January 1, 2012.

NOW, THEREFORE, BE IT FURTHER RESOLVED, the Highland County Board of Commissioners continues to support OVRDC's Economic Development District planning partnership investment grant program with the USFOC Economic Development Administration for the annual performance period January 1, 2012 through December 31, 2012.

Mr. Shaffer seconded the Resolution, and the roll being called upon its adoption, the vote resulted as follows:

Mr. Wilkin, yea ; Mr. Horst, yea ; and Mr. Shaffer, yea.

Adopted July 13, 2011

Shane Wilkin, President

Clerk

Board of Commissioners
Highland County, Ohio

STATE OF OHIO, HIGHLAND COUNTY, §:

I, Debbie Sansone, Clerk of the Board of Highland County Commissioners, do hereby certify that the foregoing resolution is a true and exact copy of Resolution No. 169, taken and copied from the record of the proceedings of said Board, recorded in Journal No. 42 on Page No. 249, and that the same is on file in the office of the Board of Commissioners.

Witness my hand this July 13, 2011.

Debbie Sansone, Clerk

RESOLUTION

Resolution No: 129-11
Date: July 12, 2011

WHEREAS, The Jackson County Board of Commissioners actively supports and currently participates in the economic development district activities of the Ohio Valley Regional Development Commission (OVRDC). OVRDC is a public regional planning commission within the State of Ohio, whose purpose is to influence favorably the future economic, physical, and social development of the twelve-county region through its regional development planning programs and technical assistance; and

WHEREAS, the Ohio Valley Regional Development Commission promotes a cooperative planning process involving local governments, public and private agencies, and individual citizens, toward improving their region within a democratic process; and

WHEREAS, the Jackson County Board of Commissioners hereby endorses the 2011 Comprehensive Economic Development Strategy (CEDS), prepared by the Ohio Valley Regional Development Commission.

THEREFORE, BE IT RESOLVED, that the Jackson County Board of Commissioners hereby authorizes an appropriation of funds in the amount of \$5,648.00 as participating local funds for the Ohio Valley Regional Development Commission to be used as part of the agency budget for the fiscal year beginning January 1, 2012. The appropriated funds to be paid on or after January 1, 2012, and

NOW, THEREFORE, BE IT FURTHER RESOLVED, the Jackson County Board of Commissioners continues to support the Ohio Valley Regional Development Commission's Economic Development District planning partnership investment grant program with the USDOC Economic Development Administration for the annual performance period January 1, 2012 through December 31, 2012.

Mr. Hall moved the adoption of the Resolution and the motion was seconded by Mr. Armstrong.

The Jackson County Board of Commissioners hereby adopts this resolution on the 12th day of July, 2011.

A RESOLUTION AUTHORIZING THE APPROPRIATION OF FUNDS IN THE AMOUNT OF \$6,635.00 AS PARTICIPATING LOCAL FUNDS FOR 2012, TO THE OHIO VALLEY REGIONAL DEVELOPMENT COMMISSION ON BEHALF OF THE CITY OF CHILLICOTHE, OHIO, AND DECLARING AN EMERGENCY.

WHEREAS, the City of Chillicothe actively supports and currently participates in the economic development district activities of the Ohio Valley Regional Development Commission (OVRDC), a regional economic development planning district within the State of Ohio whose purpose is to influence favorably the future economic, physical, and social development of the twelve-county region through its regional development planning programs and technical assistance; and,

WHEREAS, the OVRDC promotes a cooperative planning process involving local governments, public and private agencies, and individual citizens, toward improving their region within a democratic process; and,

WHEREAS, the Council of the City of Chillicothe endorses the 2012 Comprehensive Economic Development Strategy (CEDS), prepared by the OVRDC; now, therefore,

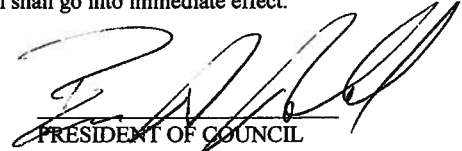

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF CHILLICOTHE, STATE OF OHIO:

SECTION 1. The Council of the City of Chillicothe hereby supports the Ohio Valley Regional Development Commission's application to the Economic Development Administration for planning funds for the period of January 1, 2012 through December 31, 2012.

SECTION 2. The Council of the City of Chillicothe hereby authorizes an appropriation of funds in the amount of \$6,635.00 as participating local funds for the Ohio Valley Regional Development Commission to be used as part of the agency budget for the fiscal year beginning in January 1, 2012. The appropriated funds are to be paid on or after January 1, 2012.

SECTION 3. This Resolution is hereby declared to be an emergency measure necessary for the immediate preservation of the public health, safety, and welfare. The reason for such necessity is that the Ohio Valley Regional Development Commission must have their financial commitments for the year 2012 at the earliest possible date. Therefore this Resolution shall go into immediate effect.

Message from the Chairman

The achievements of an organization are the results of the combined effort of each individual.-**Vincent Lombardi**

Teamwork is defined as, the process of working collaboratively with a group of people, in order to achieve a common goal. No organization better exemplifies this than the 12 member counties of OVRDC!

As our communities experienced higher unemployment, reduced revenues, and a greater number of people needing assistance, we have put into practice the old adage *when times get tough the tough get going*. TEAM OVRDC embodies this motto! With "boots on the ground" our staff has worked tirelessly with communities in all of our 12 counties and together have successfully secured necessary resources allowing us to weather this economy in the best way possible considering the obstacles. Please take a moment and read the annual report to learn about the many successes the OVRDC family together was able to accomplish. Challenges within this economy still confront us. The uncertainty of local, state, and federal revenues dictate that we address all endeavors with a creative, out of the box style of thinking. Working together we are stronger and more able to face the challenges that lie ahead.

Bob Proud
OVRDC Chairman,
Clermont County Commissioner

On behalf of the Executive Committee we would like to thank you for the role each of you have played in making certain that our OVRDC region remains strong and the best place to live, work, and raise a family! Without the help and commitment of each of you we would have never achieved the level of success we are both proud and grateful for. God bless.

Message from the Executive Director

John W. Hemmings III
OVRDC Executive Director

"SOME PEOPLE DREAM OF SUCCESS WHILE OTHERS WAKE UP AND WORK HARD AT IT." I am sure that you have heard this quote before. I think this quote describes the Ohio Valley Regional Development Commission. The success of the OVRDC is directly attributed to the work of its staff, the Executive Committee, other committees, the membership, our state and federal elected officials, and our many partners. In 2010, OVRDC was a leader in elevating the issue of broadband access to the forefront of the economic development agenda in Appalachia Ohio.

Garnering local support for a comprehensive approach to address the broadband needs of 34 counties, OVRDC's leadership, along with the Buckeye Hills-Hocking Valley Regional Development District and the Ohio Mid-Eastern Governments Association, made it possible for the Appalachia Ohio region to speak with a unified voice. Were we successful? Yes we were!

In August 2010, Horizon Telecom of Chillicothe, Ohio received a \$66.5 million National Telecommunications and Information Administration (NTIA) award to build the Connecting Appalachia Ohio Middle Mile Consortium project. Horizon Telecom will be providing \$28.5 million in matching funds for a total investment in these 34 counties of \$95 million. Success? I think so. We are proud of this and all of our successes in 2010.

We provide you this 2010 Annual Report to showcase this and the many other successes we have had together during the past year. I just ask that you wake up and continue to work hard tomorrow because we have more success ahead of us in 2011 and beyond. Thank you all for your continued support.

Connecting Appalachia Broadband Project Funded

In late 2008, discussions began about the possibility of a multi-county initiative to get broadband access to most areas of Appalachia Ohio. Three of Ohio's Local Development Districts (Ohio Valley Regional Development Commission, Buckeye Hills-Hocking Valley Regional Development District, and the Ohio Mid-Eastern Governments Association) were asked to join early in the project's development to provide regional support. The Ohio Local Development Districts were instrumental in securing local political support from their member counties for the project.

On August 18, 2010, the National Telecommunications and Information Administration (NTIA) announced the award of a \$66.5 million Broadband Technologies Opportunity Program stimulus grant to support the \$95 million Connecting Appalachia Ohio Middle Mile Consortium project, with Horizon Telecom providing the additional \$28.5 million. This grant is part of an initiative by the NTIA and the Department of Agriculture's Rural Utilities Service to expand broadband access and adoption across the country, and will bring middle-mile broadband service to 34 counties in southern and eastern Ohio, including all 12 counties comprising the OVRDC district.

58.9% of the 34 county region, or 10,000 of the area's 16,998 square miles, lacks even the most rudimentary broadband service. The area also falls behind in both the national and state averages in computer ownership and broadband adoption.

The project will directly connect 592 community institutions to broadband, including 25 community colleges, 15 university campuses, and 4 career institutions serving 55,656 students, 34 county 911 public safety answering points, 32 State of Ohio Multi-Agency Radio Communications System towers, 212 healthcare facilities and county health departments including 14 Federally Qualified Health Centers, 5 Critical Access Hospitals, 4 Rural Health Clinics and the Chillicothe VA Hospital and its 5 outpatient clinics, 231 K-12 school buildings serving 110,000 students, 34 industrial parks, and 5 State Park Conference Centers. Currently, more than 80% of those institutions do not have sufficient broadband access or entirely lack fiber-based broadband access.

In order to forge the Connecting Appalachia Ohio Middle Mile Consortium, 1,960 new miles of fiber-optic network will be constructed and 1,097 miles of backbone fiber will add 10 rings designed to serve the needs of the region. 1.7 million people in 705,000 households, of which currently 457,000 are underserved, will benefit and 37,000 businesses in the region will have access to upgraded broadband service. An estimated 230 direct jobs will result with the expectation that upwards of 500 additional jobs may be created due to indirect impacts of the project, which will create a foundation for economic growth for decades to come.

New EDA Project Review and Approval Process

The U.S. Department of Commerce, Economic Development Administration (EDA) was established under the Public Works and *Economic Development* Act of 1965 and provides funds for projects promoting economic development, implementing strategies to adjust economies, and filling knowledge and information gaps for public and non-profit institutions. For 45 years, EDA has partnered with distressed communities to foster job creation, collaboration and regional innovation. The agency's mission is to lead the federal economic development agenda by promoting competitiveness and preparing American regions for growth and success.

Recently, the process for reviewing project applications for EDA grants was revised. Before this new process, the average waiting period for approval for an EDA funded project was 290 days. The new EDA process will take no more than one calendar quarter to determine whether or not a project is deemed “Non-Competitive,” “Competitive,” or “Highly Competitive.” “Competitive” and “Highly Competitive” projects must be essentially complete, containing an eligible scope of work, a completed environmental review record showing project viability, and near complete engineering at least showing alignment of infrastructure.

Specifically, EDA is improving its grant approval process so that it is more competitive, transparent and efficient. The new process includes:

Continuous technical assistance and customer service-Applicants may submit an application at any time during the quarter and receive formal feedback on its technical and competitive merits and/or deficiencies within 15 business days.

Quarterly rounds of funding-EDA will set quarterly deadlines for submission of applications in order to be considered for an award in that quarterly funding cycle

Enhanced responsiveness-Applicants who submit a complete application package prior to the quarterly deadline will be notified of EDA's selection decisions within 20 business days of that deadline

Competitive selection framework-All projects will be assessed against EDA's strategic priorities and evaluated by an investment review committee where EDA professionals will analyze and recommend proposals to the EDA Regional Director for that quarter's available funding.

For more information about EDA programs, specific projects, or your county's grant rate eligibility, contact OVRDC Development Director Michele Throckmorton or visit the EDA web site at www.eda.gov.

OVRDC's 2010 CEDS

The U.S. Department of Commerce, Economic Development Administration (EDA) requires OVRDC to develop a Comprehensive Economic Development Strategy (CEDS) every 3 years. During 2009, Ohio Valley Regional Development Commission worked with its CEDS (Strategy) Committee to complete the 2009 CEDS, which identified the region's economic development goals and strategies for the next three years. Priority projects were also identified for possible EDA investment consideration. The CEDS Committee assisted OVRDC staff in completing the CEDS Performance Report in 2010 that identified measures of performance related to the short-term strategies identified in the 2009 CEDS as well as priority projects for possible EDA investment consideration.

OVRDC's 2009 CEDS and 2010 CEDS Performance Report may be downloaded in PDF format along with supporting information by visiting the OVRDC website at www.ovrdc.org.

Pike County Receives \$1,959,600 from EDA

In 2010, OVRDC assisted the Pike County Commissioners in making application for and receiving \$1,959,600 from the Economic Development Administration (EDA) for the Pike County Manufacturing Center Improvement Project.

This project will install 13,000 linear feet of public sanitary sewer lines and 4,200 linear feet of public roadway in order to improve the 700 acre marketable industrial site currently inhabited by 16 companies located adjacent to the US Department of Energy Piketon site along the US 23 “Energy Corridor.”

The project will serve to alleviate potential health issues that could be created by the estimated 27,000 gallons of wastewater that are generated per day by the Center with the installation of the sanitary sewer lines, 17 manholes, and 2 lift stations. Additionally, the widened and upgraded public intersection at US 23 and Seif Road will allow for a safer single-access point to the Pike County Manufacturing Center that can more easily accommodate the large turning radius of the tractor-trailers entering and exiting the complex.

Approximately 2,000 employees find work within a 1-mile radius of the Center and as a result of the upgrades, existing jobs can be retained, potential new job growth may be realized, and the economy of Pike County and surrounding areas will be stimulated by the potential for industrial, technological, and commercial growth.

Other funds secured to make this project a reality include: \$250,000 Appalachian Regional Commission, \$200,000 Ohio Valley Electric Corporation, \$750,000 Ohio Industrial Site Improvement Fund, \$20,000 Southern Ohio Agricultural and Community Development Foundation, and \$86,400 Pike County Commissioners.

Appalachian Regional Commission

During Fiscal Year 2010, the Ohio Valley Regional Development Commission provided technical assistance to public and private non-profit organizations resulting in the following outcomes: 56 jobs created, 3,037 jobs retained, 2,008 households served with water and/or sewer, 65,059 people served with up-to-date medical care, and the development of a 700-acre industrial, technological, and commercial site. The following projects helped achieve those outcomes.

Project Title	ARC Funds	Leveraged Funds
Hillsboro WWTP Expansion and By-Pass Elimination (Highland)	\$250,000	\$17,186,134
Pike Manufacturing Center Sewer Line Extension (Pike)	\$250,000	\$3,266,000
Eden park Sanitary Sewer Project (Scioto)	\$250,000	\$2,949,500
Portsmouth Water Systems Upgrade (Scioto)	\$150,000	\$406,350
Coalton Village and Coal Township Wastewater Improvements (Jackson)	\$250,000	\$3,464,000
Perry Township Waterline Extension	\$80,000	\$850,458
Holzer Regional Medical Imaging System	\$204,000	\$316,335
Richland/Jackson Townships Waterline Extension (Vinton)	\$250,000	\$313,000
Pike Hospital Diagnostic/Medical Equipment Project (Pike)	\$244,400	\$305,500
Hamden Sludge Handling Project (Vinton)	\$250,000	\$350,000
C.R. 9 & McCarty Lane/U.S. 35 Upgrade Separation Project (Jackson)	\$300,000	\$5,019,000
Appalachian Environmental Infrastructure Energy Efficiency Initiative (RCAP)	\$141,600	\$162,000
GE Peebles/Jaybird Road Restructuring (Adams)	\$250,000	\$772,000
Total	\$2,870,000	\$35,437,268

Community Development Block Grant (CDBG) Administration

The Ohio Valley Regional Development Commission (OVRDC) has, for several years, provided communities throughout the region with administration support on Community Development Block Grant (CDBG) funded projects.

In 2010, the following CDBG administration contracts were worked on by OVRDC staff: City of Greenfield Wastewater Treatment Plant Upgrade, Village of Bloomingburg Wastewater Treatment Plant Upgrade, Village of Clarksburg Wastewater Treatment Plant Upgrade, Village of Peebles Wastewater Treatment Plant Upgrade, Richmond Dale (Ross County) Sewer System, Village of Coalton Sewer System Expansion, Village of Frankfort Water System Improvements, Village of Rio Grande Sewer Line Extension, and Highland County Revolving Loan Fund.

To discuss OVRDC's administrative support capabilities for CDBG funded projects, contact OVRDC Development Director Michele Throckmorton.

Hillsboro Wastewater Treatment Plant Expansion

In 2010, OVRDC assisted the City of Hillsboro in applying for and receiving \$250,000 from the Appalachian Regional Commission (ARC) for the Hillsboro Wastewater Treatment Plant Expansion and By-pass Elimination Project.

This project will upgrade the current wastewater treatment plant by increasing the capacity and treatment ability of the facility to 6 million gallons per day. The current wastewater treatment system allows for by-pass during peak flows and as a result has put the city out of compliance with Ohio Environmental Protection Agency regulations.

As a result of the expanded wastewater treatment plant and the elimination of potential by-pass, Hillsboro will have an abundant, safe, and reliable supply of sanitary sewer and 1,800 jobs in the city can be retained.

The City of Hillsboro was also able to secure financing for the project from the Ohio Public Works Commission (\$660,000), American Recovery and Reinvestment Act (\$5,000,000), U.S. Army Corps of Engineers (\$1,000,000), and the Ohio Environmental Protection Agency (\$10,276,134).

District 15 Ohio Public Works Commission

The Ohio Public Works Commission was created to assist in financing local public infrastructure improvements for roads, bridges, culverts, water supply systems, wastewater systems, storm water collection systems, and solid waste disposal facilities. Since the creation of both the State Capital Improvement Program (District Fund) and the Local Transportation Improvement Program (LTIP), District 15, which includes Adams, Brown, Fayette, Gallia, Highland, Jackson, Lawrence, Pike, Scioto, Ross and Vinton Counties, has been successful in funding infrastructure improvements in the region, including the list below for Round 24:

District Fund - \$5,553,050

Scioto County Sewer Improvements
 Village of Coalton Water Distribution Renovations
 Pike County 10 Bridge Replacement Project and Salyers Road
 Village of Oak Hill Waterline Replacement
 Village of Leesburg Water Supply Improvement
 City of Chillicothe 2010 Street Improvement Project
 City of Washington Leesburg Avenue Sanitary Sewer Improvements
 City of Gallipolis Mill Creek Road Paving
 Brown County Commercial and Industrial Access Road Improvements
 Adams County Jaybird Road Restructuring
 Village of South Point Water Distribution Rehabilitation
 Village of Piketon Water Distribution/Storage System Improvement
 Northwest Regional Water Dry Run Water Tank Project
 City of Waverly Bridge Street Sanitary Sewer Rehabilitation and Replacement

LTIP Fund - \$6,525,373

Brown County Township Road Restructuring I
 Adams County Highway County Township and Village Road Improvement
 Lawrence County Joint Paving Project
 Scioto County Highway Improvement Project
 Lawrence County Bridge Replacement #2 – CR 31
 Vinton County CR 30 Resurfacing
 Fayette County Washington Waterloo Bridge and Resurfacing
 Gallia County Bridge Improvement Project
 Jackson County/Township 2010 Joint Project
 Ross County/Township Multi Road Repair
 Scioto County McDermott Pond Creek Road CR 46 Bridge Replacement
 Scioto County Big Spruce-Little Bear Creek CR 41 Bridge Replacement
 Scioto County Mackletree Road TR 99 Bridge Replacement
 Brown County Township Road Restructuring II
 Vinton County Woodgeard Road Bridge Rehabilitation
 Raccoon Township 2010 Gooch Road Restructuring

Small Governments Fund - \$659,035

Crown City Wastewater System Improvement
 Village of Bloomingburg Emergency Well Replacement
 Village of Lynchburg State Route 134 Sewer Extension
 Village of Cheshire Roush Lane Resurfacing

For more information on the Ohio Public Works Commission, contact
 OVRDC Community Development Coordinator, Kim Reynolds

Village of Coalton - Jackson County

In Jackson County, the Village of Coalton applied for and received \$650,000 from the Ohio Public Works Commission (OPWC) with assistance from the Ohio Valley Regional Development Commission in 2010 for wastewater improvements. This \$3,464,000 project will bring new and improved sewer service for 334 customers and businesses in Coalton and the surrounding areas along State Route 93.

This project will address health concerns over unsewered areas by providing a central sanitary sewer system in Glen Roy and other areas of Coal Township, as well as help to retain 50 jobs in Coalton and the outlying areas to be served. Additionally the upgraded wastewater system will certainly be a boon for creating the potential for new economic development to occur in the improved area.

Additional funding for the project is being provided by the Appalachia Regional Commission (\$250,000) and the Ohio Water Development Authority (\$2,564,000).

Small Business Revolving Loan Fund (RLF)

The Ohio Valley Regional Development Commission's (OVRDC's) Small Business Revolving Loan Fund (RLF) program has operated the last 24 years through two (2) loan fund programs funded by the Appalachian Regional Commission (ARC) and the U.S. Department of Commerce, Economic Development Administration (EDA).

Since it's inception, a total of 72 loans have been closed, 39 from our ARC RLF program and 33 from our EDA RLF program. The total RLF investment is \$4,715,314; \$2,798,089 from our ARC RLF and \$1,917,225 from our EDA RLF program. The total private and owner equity investments are \$25,677,768 (\$12,841,113 ARC RLF and \$12,836,655 EDA RLF). The impact of jobs created and retained is 3,439 (1,124 ARC RLF and 2,315 EDA RLF). The RLF program is an important additional financing resource for district businesses wishing to start up expand and create and/or retain full-time equivalent jobs within the OVRDC District.

For more information about the OVRDC Small Business Revolving Loan Fund, contact OVRDC Development Director, Michele Throckmorton.

OVRDC GIS User Group

In 2010, the Ohio Valley Regional Development Commission (OVRDC) staff formed the OVRDC GIS User Group. The OVRDC GIS User Group is made up of the GIS users across the 12 counties that Ohio Valley Regional Development Commission serves. These GIS users include people from all expertise levels in the public, private, non-profit and educational sectors. This is an informal group that meets quarterly.

The mission of the group:

"The OVRDC GIS User Group is an informal group that promotes geographic data sharing, supports data standardization, and provides a network for the exchange of technical information between all Geographic Information System (GIS) users. Our goals include developing a forum for open discussion of GIS issues and fostering personal communication between GIS users of all skill levels in the public, private, non-profit and educational sectors."

Main Goals:

- Offer and promote communication and coordination with the GIS community across the OVRDC District and GIS information sharing.
- Keeping our counties informed on GIS related topics from local, regional, state and national levels.
- Promote training and educational development throughout the district.
- Promote data sharing, encourage data standards and provide a network

Meetings are held approximately once every calendar quarter, and will include networking opportunities, informational and educational presentations, as well as project and product demonstrations. Meetings are hosted by the Ohio Valley Regional Development Commission located at 9329 SR 220 East, Suite A, Waverly, OH 45690.

For more information on the OVRDC GIS UserGroup, contact OVRDC Research/Planning Specialist, Jason Gillow.

2010 Census

The Census Bureau shipped local 2010 Census data to the governor and leadership of the state legislature in Ohio. After confirmation of receipt, usually within 24 hours of shipment, the Census Bureau released the data for the state of Ohio through its website. The data includes summaries of population totals, as well as data on race, Hispanic origin and voting age for multiple geographies within the state, such as census blocks, tracts, voting districts, cities, counties and school districts. According to Public Law 94-171, the Census Bureau must provide redistricting data to the 50 states no later than April 1 of the year following the census. As a result, the Census Bureau is delivering the data state-by-state on a flow basis in February and March 2011. All states will receive their data by April 1, 2011. The best choice to view the 2010 Census is through the Census Bureau's new American FactFinder site <http://factfinder2.census.gov>. To view data for OVRDC Region, go to www.ovrdc.org and click on the "2010 Census" page link.

City of Greenfield Mapping Project

OVRDC staff has been working with the City of Greenfield to map their current sanitary sewer, storm sewer and water infrastructure. OVRDC staff has been using their Trimble GeoXT Sub-meter Global Positioning System (GPS) unit to plot the City of Greenfield infrastructure data, which includes fire hydrants, water meters and valves, manholes, curb stops, storm sewer drains, etc. OVRDC staff plan to deliver digital and paper maps to the City of Greenfield of the finished work. Furthermore, OVRDC with the assistance of Highland County Geographic Information System (GIS) Department will provide services to the City of Greenfield to help maintain the data.

For more information about OVRDC's GIS capabilities and how your community may benefit from them, contact Research/Planning Specialist, Jason Gillow.

2010 Major Program Revenues & Expenditures

The Ohio Valley Regional Development Commission receives financial support from Federal, State and local funding resources which help support our 9 staff members who perform an excellent job for the Commission. Our Federal funding partnerships for 2010 are with the Appalachian Regional Commission (ARC) for our Local Development District (LDD) activities; USDA Rural Development (RD) under their Rural Community Development Initiative (RCDI) for our Project "LEAD" (Leadership in Entrepreneurial Assistance and Development), and under their Rural Business Opportunity Grant (RBOG) program for our Ohio Valley Hardwood Kiln Feasibility Study Initiative; and U.S. Department of Commerce, Economic Development Administration (EDA) under their Planning Assistance program for our Economic Development District (EDD) activities and under their Economic Adjustment Recovery Strategy program for our Economic Recovery Efforts in Fayette, Highland counties as well as Clinton County and the City of Wilmington. Our State funding partnerships for 2010 are with the Governor's Office of Appalachia (GOA) Ohio Department of Development (ODOD) for our Appalachian Local Development District and Ohio Public Works Commission (OPWC) to support the programs of the District 15 Public Works Integrating Committee. The local resources are from 12 member counties and administrative contracts with local political subdivisions for grants management services, which have helped leverage the federal and state resources. In addition, OVRDC is subcontracted by the Ohio University Voinovich School for Leadership and Public Policy to assist with their EDA funded Regional Economic Advancement Program.

FY 2010 Revenues

ARC - LDD	\$207,609
USDA RD	\$18,492
USDOC EDA EDD	\$40,971
USDOC EDA EARS	\$56,278
ODOD	\$140,590
OPWC	\$65,000
LOCAL	\$68,215
Total Revenues	\$597,155

FY 2010 Expenses

Personnel	\$244,452
Fringe	\$96,900
Travel	\$23,933
Equipment	\$6,654
Supplies	\$4,695
Contractual	\$63,557
Other	\$33,833
Indirect	\$123,131
Total Expenses	\$597,155
